

DIRECTIONS FOR USE

Clean all grain from bin, then thoroughly clean behind all partitions, walls, etc., and try to sweep out all grain stuck in cracks in the floor. Check outside and under granary for grain that might have sifted out of the bin and if any is found, clean it up. Then plug the holes in the bin.

After the bin has been cleaned, then spray all of the inside surfaces with WOODBURY GRAIN BIN SPRAY until the walls are wet, but not to the run-off point. Be sure to spray removable doors, behind false walls, etc. 1 gallon covers approximately 500 sq. ft. of surface area.

If possible, it is well to spray at least two weeks before storing grain.

Grain Bin Spray

Made Especially for Treating Empty Grain Bins Before Filling With Grain

CAUTION!!!

KEEP OUT OF REACH OF CHILDREN

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY LABELING

ACTIVE INGREDIENTS: 100%	
Chlorpyrifos methyl	95.00%
Hydroquinone	5.00%
TOTAL	100.00%

For the control of insects such as weevils, confused flour beetles, flat grain beetles, granary weevils, fungus beetles, lesser grain borers, red flour beetles, rice weevils and saw-toothed grain beetles which are exposed or become accessible by emerging from burrows and cracks of woodwork after thoroughly cleaning empty grain storage bins.

HARMFUL IF SWALLOWED.

Do not use or store near heat or open flame.

This product will kill fish. Keep out of any body of water. Apply this product only as specified on this label. Rinse equipment and containers and dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed by punching holes in them and burying with water, or by burning. (Keep out of Smoke.)
