

For use in areas of frequent use. Also, in the control of fleas if used continuously. Aids in the control of the flea infestation and allows animals to rub their faces.

FOR USE IN BACK RUBBERS ONLY: Dilute 1 gallon of this material with 7 gallons diesel oil or kerosene. Saturate backrubber at the rate of 1 gallon diluted solution to 20 feet of cable, or apply with automatic backrubber by filling reservoir with diluted solution. If a thicker solution is desired, 6 gallons of diesel oil and 1 gallon of NEW 20 weight NON-DETERGENT motor oil may be mixed with 1 gallon of this concentrate. Never use USED motor oil. Place backrubber near back of animal in areas where animals congregate. For best results with face rubbing, use of a green-type backrubber is recommended. Do not place petroleum products within the animal's reach to rub their faces.

Make sure that you wash hands thoroughly after use. Wash the backrubber with soap and water after handling and before eating or drinking. Do not use rubber backrubber in stalls, if you wish, that are visited by children, and do not use rubber backrubber in areas of children.
