GENERAL DIRECTIONS

3% CIODRIN Insecticide is a specially prepared ready-to-use livestock dusting device that can be used continuously on lactating and non-lactating dairy cattle and beef cattle. No feed-off period is required when used on animals being fed for slaughter. Do not treat calves under 6 months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates.

USE and DIRECTIONS FOR APPLICATION

DUST BAG--ANIMAL DUSTING STATIONS

For the control of hornflies and as an aid in the control of lice and face flies

on lactating and non-lactating dairy cattle and on beef cattle,

suspend bags such that daily use is required near mineral or salt blocks, in exit ways leading from dairy barns or other animal buildings. On a free choice basis, one bag per 25-30 animals, dust bags may be suspended in livestock holding pens, feed lots and loafing sheds where possible. Adjust bag such that the bottom is below the topline of the animals in order to obtain maximum coverage.

Precautions in Using

CAUTION!

Keep out of reach of children

Harmful if swallowed. Avoid inhalation of dust and contact with skin. In case of

contact with skin or eyes, flush with plenty of water; for eyes get medical attention. Keep away from open flame. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate any body of water, by direct application, cleaning of equipment, or disposal of wastes or containers. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal. 2 PAM is also antidotal and may be used in conjunction with Atropine.

DESTROY USED CONTAINERS. Do not reuse for any purpose. Destroy container by burning or burying in an isolated area. If burned, keep out of smoke.

NON-WARRANTY: buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions given herewith.
