## WOODTREAT AA

### PENETRATING PENTA COATING

FOR INDUSTRIAL USE ONLY

#### DIRECTIONS FOR USE

Stir well until entire contents have the same consistency. Before treating poles, remove all decayed wood.

With a brush, spray, trowel, gun, or other suitable device, apply a coating of 1/4 inch thick around the ground line area of the pole in a band 18 to 24 inches wide, extending 2 to 6 inches above the ground line. Cover the treated area with a suitable plastic coated paper to increase the effectiveness of the treatment.

This product contains 10.18% Technical Pentachlorophenol which meets Federal Specification TT-W-570 and American Wood-Preservers' Association Specification P-8. The solvent system meets the AWPA specification P-3 for a heavy petroleum solvent.

#### CAUTION

- Keep from freezing.
- Keep container tightly closed when not in use.
- Always stir contents well before using.
- If product becomes oily, stir well and then stir in water sparingly to restore the product to its original creaminess. Do not add more water than is necessary. Generally only a few ounces of water will be needed for a 5-gallon bucket of this product.
- Do not get this material on desirable shrubs or other vegetation.

#### NOTICE

Avoid contamination of feed or foodstuffs. Do not reuse container. Return to drum reconditioner or destroy and bury in a safe place. Do not contaminate water by cleaning equipment or disposal of waste and containers. Treated sawdust and other wood wastes should not come in contact with domestic animals, or be used as mulch where it will come in contact with useful living plants.

For field treatment of poles and stubs in line, timber structures, and cuts or holes in treated wood, to protect against fungi (decay) and termites.
