# ANTI-STAIN

## FUNGICIDE

### CONCENTRATED FUNGICIDAL WETTABLE POWDER FOR CONTROL OF BLUE STAIN & MOLD ON LUMBER

#### GENERAL INFORMATION

Sap stain, commonly called blue stain, is caused by several species of newl, sawed, and green lumber. Blue stain causes permanent discoloration of light-colored lumber, frequently resulting in degradation in value of a product. Surface mold attacks fresh sawed lumber and leaves objectionable mold growth on the surface of the lumber.

Chemform Anti-Stain Fungicide Concentrate is a specially formulated wettable powder fungicide used in the control of the above named fungi on lumber. It is a 70% concentrate which is long enough for the sawn lumber to be treated with 24-hour moisture in the critical level for the support of the organism, or with a wettable powder fungicide before the lumber is shipped. It is used on the surface of the lumber to prevent mold growth and to keep the surface free of sap stain during the drying process.

For control of wood-boring insects, which cause damage to lumber, apply this product to the stain organisms. Chemform Brand EHC fungicide concentrate is a wood preservative and may be applied to the lumber along with Chemform Brand Anti-Stain Fungicide to give broader protection.

**Warning:** This material is extremely poisonous. Avoid contact with skin, eyes, nose, mouth, and clothing. Use only in a well-ventilated area. Do not breathe dust. Wash hands thoroughly after contact with water. Do not eat, drink, or smoke while using this material.

**DANGER — Keep Out of Reach of Children**

**ANTIDOTE:** If swallowed, give water. If in eyes, flush with water. If on skin, wash with soap and water. If inhaled, get fresh air.

#### Active Ingredients:

Triphenyl Mercury Bromide	1.6%
Chlorophenyl Dimethyl Carbamate	37.5%
2,4-Dichlorophenoxy Dimethyl Carbamate	40.9%

#### Inert Ingredients

	56.9%
Manufactured by	CHEMICAL FORMULATORS, INC.
	Nitro, W. Va.

#### DIRECTIONS

Apply Chemform Anti-Stain Fungicide Concentrate to the surface of the lumber to be treated. Use a brush, sprayer, or other suitable application method. Apply to the surface of the lumber before it is shipped or before it is stored. Apply to the surface of the lumber before it is stored. Apply to the surface of the lumber before it is stored. Apply to the surface of the lumber before it is stored.

For control of wood-boring insects, which cause damage to lumber, apply this product to the stain organisms. Chemform Brand EHC fungicide concentrate is a wood preservative and may be applied to the lumber along with Chemform Brand Anti-Stain Fungicide to give broader protection.
