BAT & MOUSE BAIT

**NOTICE OF REGISTRATION UNDER THE FEDERAL
INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT**

NAME AND ADDRESS OF REGISTRANT

Wil-Kil Pest Control Company
522 W. North Avenue
Milwaukee, Wisconsin 53212

Attention: Mr. G. E. Pings

BEST DOCUMENT AVAILABLE

NOTE: Changes in labeling or formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Pesticides Regulation Division prior to use of the label in interstate commerce. In any correspondence on this product always refer to the above registration number.

On the basis of the information furnished by the registrant, the above named economic poison is hereby registered under Section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this registration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Department. In order to protect the public, the Secretary, on his own motion, may at any time cancel the registration of an economic poison in accordance with Section 4 (c) of the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by a trademark held by others.

The following paragraphs are applicable only when checked:

- To expedite registration, this notice is being issued on the basis of the draft submitted with the application. Certain defects, given below, have been noted. These corrections must be incorporated when the printed labeling is prepared. Five copies of the printed labeling must be submitted to complete the file on this product.
- The registration for this product is being issued with the understanding that certain defects in the labeling which are noted below will be corrected as soon as possible. Objection is not raised to the use of the present labeling for a reasonable period of time while fully corrected labeling is being prepared. Five copies of the corrected labeling must be submitted.
- 1. "Diphacin" is not an accepted common name, and as such is not allowed in the ingredient statement. It may be stated outside the ingredient statement as a substatement.

CAUTION

KEEP OUT OF REACH OF CHILDREN

This rodenticide contains an anticoagulant chemical as its active ingredient, therefore must be placed where children, poultry, livestock or pets cannot reach it. In the event it is eaten, call a physician immediately. In the meantime, give a teaspoon of salt in glass of warm water to induce vomiting and repeat until vomit fluid is clear.

NOTE FOR PHYSICIANS: When a human has been known to have accidentally ingested this bait containing Diphacinone (2-Diphenylacetyl-1,3-indandione), blood transfusions combined with intravenous injections and oral doses of Vitamin K-1 are indicated as in the case of hemorrhage caused by overdose of Bihydroxycoumarin.

ACTIVE INGREDIENTS:

Diphacinone	2 -	indandione	00.00%	.005
Diphacinone (2-Diphenylacetyl-1,3-indandione)			99.00%	.995
Total			100.000%	

INERT INGREDIENTS:**Total**

DIRECTIONS :

Place baits in locations where rats and mice travel. Bait placements along walls, in corners, and other concealed locations where rats and mice can feed unobserved. If baits become contaminated or spoiled baits should be replaced promptly. Baiting should continue until all signs of feeding have stopped.

Where a continuous source of infestation is present (near dumps, etc.) permanent bait stations should be established and replenished as needed. Bait station should be made of sturdy material so that they will not easily be crushed or turned over. It is always desirable to use bait stations to protect bait from pets, children, and contamination from dust, rain, etc.

DIRECTIONS FOR RAT CONTROL

- Four ounces of bait per station should be used.
- Bait should be placed in locations not accessible to children, pets, and domestic animals, or in tamper-proof bait boxes.
- An uninterrupted supply of bait should be maintained for at least 10 days.

DIRECTIONS FOR MOUSE CONTROL

- Tablespoon amounts (1/4 to 1/2 ounce) should be placed at 8 - 12 foot intervals.
- Bait should be placed in locations not accessible to children, pets, and domestic animals, or in tamper-proof bait boxes.
- An uninterrupted supply of bait should be maintained for at least 15 days.
