TCA PELLETS GRASS KILLER

NOT FOR
REPRODUCTION

contains a corrosion inhibitor

GENERAL INFORMATION

1. TCA Pellets is a selective herbicide which kills grasses and other broadleaf weeds in lawns, parks, and other areas where a clean, well-maintained appearance is desired. It is effective against many common lawn weeds, including crabgrass, dandelion, and clover. TCA Pellets is a granular formulation which is easy to apply and does not require special equipment. It is safe for use on most types of lawns and is non-toxic to humans and animals when used as directed. TCA Pellets is a registered pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act.

USE DIRECTIONS

1. Apply TCA Pellets to lawns and other areas where grasses and broadleaf weeds are present. Apply in a uniform layer over the entire area to be treated. Use the recommended application rate of 1/2 pound per 1,000 square feet. Water the treated area thoroughly after application. TCA Pellets is effective against many common lawn weeds, including crabgrass, dandelion, and clover. It is safe for use on most types of lawns and is non-toxic to humans and animals when used as directed.

PAVEMENT MAINTENANCE

Areas to be Surfaced: TCA Pellets can be used to kill weeds and grasses growing in cracks and crevices in concrete and asphalt pavements. It is also effective against weeds and grasses growing in the spaces between paving stones. TCA Pellets is a granular formulation which is easy to apply and does not require special equipment. It is safe for use on most types of pavements and is non-toxic to humans and animals when used as directed.

Grasses and Weeds in Existing Pavement: TCA Pellets can be used to kill grasses and weeds growing in existing pavements. It is effective against many common lawn weeds, including crabgrass, dandelion, and clover. TCA Pellets is a granular formulation which is easy to apply and does not require special equipment. It is safe for use on most types of pavements and is non-toxic to humans and animals when used as directed.

USE PRECAUTIONS

To Avoid Plant Injury: Do not apply TCA Pellets to plants or areas where plants are growing. TCA Pellets is a selective herbicide which kills grasses and other broadleaf weeds. It is safe for use on most types of lawns and is non-toxic to humans and animals when used as directed.

TROPICAL GRASSES
DOW

Apply to the grasses listed on the label with DOW TCA PELLETS to control the grasses listed on the label. Do not apply to other plants. For more information, see the label for DOW TCA PELLETS.

USE DIRECTIONS

Apply to the grasses listed on the label with DOW TCA PELLETS to control the grasses listed on the label. Do not apply to other plants. For more information, see the label for DOW TCA PELLETS.

BERMUDAGRASS (Monocot) Apply 1/2 to 1 1/2 pounds per acre to control bermudagrass.

JOHNSONGRASS Apply 1/2 to 1 1/2 pounds per acre to control johnsongrass.

PARAGRASS (Tall Panicum) Apply 1/2 to 1 1/2 pounds per acre to control paragraphrass.

PHRAGMITES (Plume Grass) Apply 1/2 to 1 1/2 pounds per acre to control phragmites.

GUACKGRASS Apply 1/2 to 1 1/2 pounds per acre to control guackgrass.

TORPEDOGRASS, HILOGRASS Apply 1/2 to 1 1/2 pounds per acre to control torpedo and hilograss.

SPOT TREATMENT OF PERENNIAL GRASSES Use 1/2 pound of DOW TCA PELLETS in a gallon of water and spray thoroughly with the grass to be treated.

GRASS SUPPRESSION AND SEEDLING GRASS CONTROL Apply 2 to 15 pounds per acre to suppress grasses without killing the grass. This works well on the grasses listed on the label and quackgrass when used just before mowing. Repeat as necessary. This also controls wild grass seedlings and will prevent new seedling emergence for some time.
