DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

General Information

LORSBAN 50W insecticide is a wettable powder formulation designed for use as a cover spray to control various pests injurious to apples. The pests controlled are listed in the accompanying table. LORSBAN 50W is compatible with insecticides, miticides, and fungicides commonly recommended in orchard spray schedules except for alkaline materials such as Bordeaux mixture and lime.

Mixing instructions

LORSBAN 50W mixes readily with water to form a suspension. Mix the required amount of LORSBAN 50W with a small quantity of water and add this premix while filling the spray tank. Alternatively, fill the tank with the required amount of water and then add the premix. Maintain sufficient agitation during both mixing and application to ensure uniformity of the spray mixture. LORSBAN 50W contains a wetting agent. Do not use additional wetting agents, spreaders or stickers.

Use and Dosage Recommendations

Use LORSBAN 50W at the dosages indicated by application as a foliar spray to control the pests listed in the following table. Make the application as a dilute or concentrate spray using conventional power-operated ground spray equipment that will ensure thorough and complete coverage of the foliage and fruit. Treat when pests appear or in accordance with local conditions. Consult your State Agricultural Experiment Station or Extension Service specialist for specific use information in your area.

DOSAGE AND USE RECOMMENDATIONS

for LORSBAN 50W wettable powder insecticide
