Hazards to Humans and Domestic Animals

- * MAY BE HARMFUL IF SWALLOWED
- ⇒ HARMFUL IF ABSORBED THROUGH SKIN
- * Do Not Get In Eyes, On Skin Or Clothing
- * Avoid Breathing Spray Mist
- * Wash Thoroughly With Soap And Water After Handling And Before Eating Or Smoking
- * Remove Contaminated Clothing And Wash Before Reuse
- * Keep Away From Food, Feedstuffs, And Water Supplies

STATEMENT OF PRACTICAL TREATMENT:

- * If Swallowed: Call a physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not give anything by mouth to an unconscious person.
- * If On Skin: Wash with plenty of soap and water. Geomedical attention if irritation develops.
- * If In Ryes: Flush with plenty of water for 5 minutes. Cet medical attention if irritation persists.
- * If Inhaled: Remove to fresh air if symptoms of cholinesterase inhibition appear and get medical attention immediately...

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Freat symptomatically. Atropine, only by injection, is the preferable intidote. Oximes, such as 2-PAM/protopam, may be therapeutic if dised early; however, use only in conjunction with atropine. In case of severe acute poisoning, use antidote immediately after establishing an open irrway and respiration.

10/1

Environmental Hazards

This pesticide is toxic to birds and wildlife. Do not apply directly to water. Drift and runorf from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Do not contaminate water by cleaning of equipment or disposal of waste.

NOTICE

Read and understand the entire label before using. Use only according to label directions. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do Not Ship or Store with Food, Feeds, Drugs, or Clothing

Before buying or using this product, read "WARRANTY LIMITATIONS AND DISCLAIMER" elsewhere on this label. If terms are not acceptable, return unopened package at once to seller for full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under WARRANTY LIMITATIONS AND DISCLAIMER.

IN CASE OF AN EMERGENCY

GENERAL INFORMATION

DURSBAN MEO2 insecticide is a flowable microencapsulated concentrate designed for use as a residual spray to control various pests in and around residential and non-residential structures to DURSBAN MEO2 may be sprayed on any surface which will not be damaged or stained by water. A visible deposit may appear on some dark surfaces. This deposit can be easily removed with a cloth or damp sponge.

Do not apply this product to conduits, motor housings, junction and switch boxes, or other electrical equipment because of possible shock hazard.

Attention: Do not allow spray to contact food or food-contacting surfaces, feedstuffs, or water supplies. Thoroughly wash dishes and food handling utensils with soap and water if they become contaminated by application of this product. Remove pets and cover rish bowis (tanks) before spraying. Do not use in fogging equipment to apply the product indoors. Do not allow adults, children or petucon treated areas until spray has bried. Keep out of fishpools or other hodies of water. Do not treat vegetable gardens. Do not use in poultry houses.

General Pest Control Indoors

DIRECTIONS FOR USE

DURSBAN MEO2 may be applied within residential and non-residential buildings or structures and within nonfood areas of industrial, institutional, and commercial buildings, including hospitals, stores, manufacturing plants, and warehouses. Apply as a localized spray to areas where insects are found or normally occur. Such areas include but are not limited to dark corners of rooms and closets; floor drains; cracks and crevices in walls; along and behind sinks, stoves, retrigerators, and cabinets; and around plumbing and other utility installations. A period of 4 to 7 days is normally required to observe maximum effectiveness on insect populations; therefore, limit retreatments to not more often than once per every 7 days. Apply spray in such a manner as to minimize spray contact with non-target surfaces.

Indoor Pests Controlled With DURSBAN MK02*

Ants(1) Brown dog ticks(2) Carpet beetles(3) Centipedes Clover mites Cockroaches (Such as: American. Brownbanded, German, Oriental, Smokey brown, Asian)(4) Crickets Earwigs Firebrats Fleas(5) Flour beetles (Confused, Fed. Saw-toothed) Indian meal moths Mediterranean flour moths Millipedes Rice weevils Silverfish Sowbugs Spiders

Numbers in parentheses refer to Specific Directions.

Specific Indoor Use Directions

Ants may be controlled by freating ant trails and wherever elise these
pests may find entrance. For example, around doors and winfows.

- 2) Brown dog ticks may be controlled by applying spray to infested areas, such as per bed; and resting quarters; nearby cracks and crevices; along baseboards windows and door frames, where these pests may be present. For best results, old bedding should be removed or replaced with clean, fresh bedding after treatment. Do not treat pets with this product.
- 3) Carpet beetles may be controlled by thoroughly applying the spray as a spot treatment along baseboards and edges of carpeting; under carpeting, rugs and furniture; in closets and on shelving. Spots are defined as to areas not to exceed two square feet and two spots cannot be connected.
- 4) Cockroaches are best controlled by making crack and crevice or spot treatments. Treat where insects are found or normally occur including, but not limited to, dark corners of rooms and closets; floor drains; cracks and crevices in walls; along and behind baseboards; beneath and behind sinks, stoves, refrigerators, retrigerator units, and cabinets; and around plumbing and other utility installations. Crack and crevice treatments are applied by delivering a pin stream or small amounts of solution directly into cracks or voids. Spot treatments are defined as areas not to exceed two square feet. Two spots cannot be connected. Limit spot applications to less than 20% of the lower wall and floor surface.
- 5) Fleas are best controlled by a total management program. It is suggested that infested areas be thoroughly vacuumed prior to treatment. These areas include all carpet, upholstered furniture, baseboards and other indoor areas frequented by pets. The vacuum cleaner bag should be discarded in an outdoor trash container. Pet bedding should be cleaned or replaced. Other than the applicator, premises should be vacated during application. Cover aquaria and fish bowls and remove other pets. Do not permit humans or pets to contact treated areas until spray has thoroughly dried.

Indoor flea control is achieved by thorough coverage and deep carpet penetration. A rate of 1 gallo of spray per 1,600 square feet may be applied; however, the application rate should be adjusted to provide uniform coverage without soaking the treated areas. Entire carpets may be treated. If fleas reappear in about 1-2 weeks after treatment it is probably because they have hatched from their pupal (cocoon) stage. If this occurs, either repeat treatment or allow the product's time-release microcapsules another week, to, kill:hewly emerged fleas. Do not treat pets with this product.:

Effective flea control includes controlling the source of fleatinfestations. This can require treatment of pets with a product registered for flea control and treating outside areas frequented by pets. DURSBAN MEO2 can also be applied out-of-doors for fleating control.

General Pest Control Outdoors

DIRECTIONS FOR USE

Use DURSBAN MEO2 to control outdoor pests listed in the accompanying table by application as either a perimeter treatment or as a localized spray.

Perimeter treatments help prevent intestation of buildings. When making perimeter treatments, apply DURSBAN MEO2 where pests are active or may find entrance. For example, treat a band of soil 6 to 10 feet wide around and adjacent to buildings and treat the building foundation to a height of 2 to 3 feet. Apply as a coarse spray at the rate of about 1 gallon of spray per 100 sq. ft. Thoroughly and uniformly wet the band area.

Localized sprays provide control of insect pests on outside surfaces of buildings and other outdoor areas where pests congregate. Treat by applying the dilution directly to target areas such as cracks and crevices; along sidewalks or patios; windows and door frames; or other areas where pests may be present.

Outdoor Pests Controlled by DURSBAN ME02*

Ants Bees Beetles Carpenter ant Carpenter bees Clover mites Cockroaches Crickets Earwigs Fleas Flies Hornets Millipedes Mosquitoes Scorpions² Silverfish Sowbugs Spiders Ticks Wasps Yellowjackets

For Scorpions remove accumulations of lumber, firewood, and other materials which serve as harborage sites. Before stacking firewood or lumber, apply DURSBAN MEO2 to surfaces immediately below such materials. Band treatments may also be helpful in reducing pests immigrating from surrounding areas.

STORAGE AND DISPOSAL

Do not contaminate water food or feed by storage or disposal.

Storage: Store in original container in secured dry storage area. Prevent cross-contamination with other pesticides or fertilizers. Do not store above 122°F for extended periods of time. Preferred storage is above 32°F. Storage below 32°F may result in solidification. If warmed to above 32°F, product will return to original form. Freezing does not adversely affect this product. If container is damaged or spill occurs, use product immediately or dispose of product and damaged container as indicated below.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Do not reuse empty container. Wrap em ty container in heavy paper, i.e. newspaper, and place in trash.
