UNITED STATES ENVIRONMENTAL PROTECTION AGENCY Washington, D.C. 20460

## JAN 18 2007

OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Ms. Maureen Miksztal Senior Regulatory Specialist for, The Dow Chemical Company 171 River Road Piscataway, NJ 08854

Subject: UCARCIDE 15 Antimicrobial EPA Registration Number 464-693 Your Notification Dated December 28<sup>th</sup>, 2006 EPA Received Date January 3<sup>rd</sup>, 2007

The notification referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, FIFRA, as amended, to add the phrase, "produced for", to the product labeling, is acceptable.

The notification has been made part of the file.

If you have any questions concerning this letter, please contact Karen M. Leavy at (703)-308-6237.

Sincerely,

Marshall Swindell Product Manager 33 Regulatory Management Branch I Antimicrobial Division(7510P)

## Subject: UCARCIDE™ 15 Antimicrobial, EPA Reg. No. 464-693 Notification of Minor Label Change

Dear Sir/Madam:

Per PR Notice 98-10, The Dow Chemical Company is submitting a notification to the registration for UCARCIDE<sup>™</sup> 15 Antimicrobial, EPA Reg. No. 464-693. This notification includes a minor change to the UCARCIDE<sup>™</sup> 15 Antimicrobial, EPA Reg. No. 464-693 labeling. Please find enclosed the following documentation in support of this application:

- Application Form, EPA Form 8570-1
- Draft label with highlighted changes

Please contact me at 732-563-5586 with questions or comments regarding this submission. Thank you for your assistance.

Sincerely,

Miken lat

Maureen Miksztal Senior Regulatory Specialist

cc: Mr. Marshall Swindell, PM-33

Enclosure

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

## DANGER KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes irreversible eye damage. Causes skin irritation. Harmful if inhaled. Harmful if swallowed. Harmful if absorbed through skin. Protonged or frequently repeated skin contact may cause allergic reactions in some individuals. Causes asthmatic signs and symptoms in hyper-reactive individuals.

Do not get in eyes, on skin, on clothing. Avcid breathing vapor. Do not swallow. Wear goggles, protective clothing, and butyl or nitrile gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

## ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into takes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA

## STORAGE AND HANDLING

UCARCIDE TM 15 Antinicrobial is incompatible with many commonly used materials of construction such as steel, gaivanized iron, aluminum, tin, and zinc. UCARCIDE TM 15 Antinicrobial can be stored and handled in baked phenolic-lined steel, polyeithylene, stainless steel, or reinforced epoxyplastic equipment. This product freezes at about 20.3°F (-6.5°C). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures of up to 100°F (37.8°C) can be tolerated but the preferred maximum storage temperature is about 80°F (26.7°C).

A stainless steel centrifugal pump is suggested for transfer service. Spiral-wound stainless steel with TEFLON® Polymer is suitable for gaskets and packing.

Handle in a well-ventilated area. If vapors are irritating to the nose or eyes, special ventilation or respiratory protection (MSHA/NIOSH approved air putilying respirator equipped with an organic vapor cartridge) may be required.

## LIMITED WARRANTY AND DISCLAIMER

Seller warrants that the product conforms to its chemical description as contained on this label and is reasonably fit for the purposes stated on this label when used in accordance with directions under normal conditions of use. THE WARRANTIES MADE IN THIS PARAGRAPH ARE SELLER'S SOLE WARRANTIES WITH RESPECT TO THE PRODUCT AND ARE MADE EXPRESSLY IN LIEU OF AND EXCLUDE ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE AND ALL OTHER EXPRESS OR IMPLIED REPRESENTATIONS AND WARRANTIES.

## BEFORE HANDLING OR USING THIS PRODUCT, SEE YOUR EMPLOYER AND READ CURRENT MATERIAL SAFETY DATA SHEET.

## STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticide wastes are toxic Improper disposal of excess pesticide. spray mixture or imsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or your Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL: Metal Containers or Plastic Containers: Triple rinse (or equivalent) Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or other procedures approved by state and local authonities. Plastic Containers: May be incinerated, or, if allowed by state and local authonities, by burning. If burned, stay out of smoke. Metal Containers: Must not be incinerated. Do not cut or weld on or near metal containers.

FIRST AID

## If swallowed:

- Call a poison control center or a doctor immediately for treatment advice.
- DO NOT INDUCE VOMITING.
- Do not give anything to drink.
- If in eyes:
- Wash immediately and continuously with flowing water for at least 30 minutes.
- Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation, preferably from an ophthalmologist.
- Call a poison control center or a doctor immediately for treatment advice.
- It on skin or clothing:
- Take off contaminated clothing.
- · Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or a doctor for treatment advice.
   If inhaled:
- Move person to fresh air.

Dov

If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-n Call a poison control center or a doctor for further treatment advice

NOTE TO PHYSICIAN: Aspiration may cause lung damage. Probable mucosal damage ma use of gastric lavage.

Have the MSDS and, if available, the product container or label with you when calling a poisor doctor, or going for treatment.

## DIRECTIC'IS FOR USE 6

It is a violation of Federal law to use this ..... Just in a manner inconsistent with its labeling

## AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS/

RECIRCULATING COOLING AND PROCESS WATER SYSTEMS This product may be used only in industrial air washers and air washer systems which have misteliminating components

UCARCIDETM 15 Antimicrobial should be added at the application rates described below, to a water treatment system a: a convenient point of uniform mixing such as the basin area. Addition may be made intermittently (SLUG DOSE) or continuously Badly fouled systems can be shock treated with UCARCIDETM 15 Antimicrobial Under these conditions, blowdown should be discontinued for up to 24 hours

UCARCIDE1M 15 Antimicrobial can be used in industrial process water systems that contain ultra filtration units and non-medical reverse osmosis membranes (where approved for compatibility by the membrane manufacturer) and associated distribution systems

## INTERMITTENT (SLUG DOSE) METHOD

Initial Dose: When the system is noticeably fouled, apply 4.1 to 8.2 fluid ounces of UCARCIDE TM 15 Antimicrobial per 100 gallons of water in the system. Repeat until control is achieved

Subsequent Dose: When microbial control is evident, add 1.6 to 4.1 fluid ounces of UCARCIDE TM 15 Antimicrobial per 100 gallons of water in the system weekly, or as needed to maintain control. Badly fouled systems must be cleaned before treatment is begun.

## CONTINUOUS FEED METHOD

Initial Dose: When the system is noticeably fouled, apply 4.1 to 8.2 fluid ounces of UCARCIDETM 15 Antimicrobial per 100 gallons of water in the system

Subsequent Dose: Maintain this treatment level by starting a continuous feed of 0.8 to 4.1 fluid ounces of UCARCIDETM 15 Antimicrobial per 100 gallons of water in the system per day Badly fouled systems must be cleaned before treatment is begun.

## SERVICE WATER AND AUXILIARY SYSTEMS

UCARCIDE<sup>1M</sup> 15 Antimicrobial should be used at the same application rates, and in the same manner as described above it should be added to the system at a point that will allow for uniform mixing throughout the system

## HEAT TRANSFER SYSTEMS

(Evaporative Condensers, Dairy Sweetwater Systems, Hydrostatic Stanlizers and Retorts, and Pasteurizers and Warmers and Once-Through Cooling Water Systems)

UCARCIDETM 15 Antimicrobial should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point of uniform mixing such as a basin area, sump area or other reservoir or collecting area from which the treated water will be circulated uniformly throughout the system

## INDUSTRIAL WASTEWATER SYSTEMS

(Wastewater Systems, Wastewater Sludge and Wastewater Holding Tanks)

UCARCIDETM 15 Antimicrobial should be added to a wastewater system or sludge at a convenient point of uniform mixing such as the digester. Add 1.4 to 7.2 gallons (1500 to 7,500 ppm UCARCIDE TM 15 Antimicrobial) per 1,000 gallons of wastewater or sludge

#### MACROFOULING CONTROL Not for use in the state of California

UCARCIDETM 15 Antimicrobial should be added continously to maintain a level of 20 ppm active ingredient in the system for a period of at least 96 hours.

Initial Dose: When macrofouling is present in the system, apply 16.3 fluid ounces of UCARCIDETM 15 Antimicrobial per 1,000 gallons of water in the system. Continue to add as needed to maintain the 20 ppm active ingredient level for a period of at least 96 hours

BEET SUGAR MILLS AND BEET SUGAR MILL PROCESS WATER SYSTEMS UCARCIDETM 15 Antimicrobial should be added to the system at a point of uniform mixing such as the diffuser, transport water pump, weir box, or diffuser feed water pump. Additions may be made intermittently (SLUG DOSE) or continuously

## INTERMITTENT (SLUG DOSE) METHOD

Initial Dose: When the system is noticeably contaminated, add 19.6 to 49 1 fluid ounces (667 to 1,667 ppm product) of UCAFCIDETM 15 Antimicrobiall per ton or 640 to 1,600 mL of UCARCIDETM 15

Animicrobial per metric ton of sliced beets as a slug dose. Repeat until control is achieved. Subsequent Dose: When microbial control is evident, add 2.94 to 29.4 fluid ounces (96 to 960 ppm) of UCARCIDE<sup>TM</sup> 15 Antimicrobial per ton or 96 to 960 mL of UCARCIDE<sup>TM</sup> 15 Antimicrobial per met-

not exceed 350 gallons per 1,000 tons of beets sliced per day CONTINUOUS FEED METHOD

Initial Dose: When the system is noticeably contaminated, add 19.6 to 49.1 fluid ounces/minute (667 to 1,667 ppm product) of UCARCIDETM 15 Antimicrobial per ton or 640 to 1,600 mL/minute of UCARCIDE TM 15 Antimicrobial per metric ton o' beets sliced per minute in the system via automatic pump of suitable construction.

Subsequent Dose: When microbial control is evident, add 2.94 to 29.4 fluid ounces/minute (100 to 1.000 ppm) of UCARCIDETM 15 Antimicrobial per ton or 96 to 960 mL/minute of UCARCIDETM 15 Atimicrobial per metric ton of beets sliced per minute in the system, or as necessary to maintain control. The total should not exceed 350 gallons per 1,000 tons of beets sliced per day

PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS UCARCIDE <sup>TM</sup> 15 Antimicrobial should be added to the paper making system at a poin of uniform mixing such as the beaters, broke chest pump, save-all tank, or white-water tank.

Initial Dose: When the system is noticeably contaminated, add 1.7 to 9.9 lbs of LICARCIDE TM 15 Antimicrobial per ton of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved Heavily fouled systems should be boiled out prior to initial treatment.

Subsequent Dose: When microbial control is evident, add 1.0 to 6.6 lbs of UCARCIDE TM 15 Antimicrobial per ton of pulp or paper (dry basis) as a slug dose as necessary to maintain control.

## PIGMENTS AND FILLER SLURRIES FOR PAPER AND PAPERBOARD

(For use in food contact and non-food contact pigments and filler slurries)

Use from 0.33 to 2.0 lbs of UCARCIDE TM 15 Antimicrobial per 1,000 lbs of dry powder to produce a concentration from 333 to 2,000 ppm as product (based on sturry solids) in the mixed slurry.

### WATER BASED COATINGS FOR PAPER AND PAPERBOARD NOTE: For use in non-food contact coatings only

Use from 0.33 to 2.0 lbs at UCARCIDETM 15 Antimicrobial per 1,000 lbs at dry powder to produce a concentration from 333 to 2,000 ppm as product (based on sturry solids) in the mixed slurry

## AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS/

#### RECIRCULATING COOLING AND PROCESS WATER SYSTEMS This product may be used only in industrial air washers and air washer systems which have misteliminatino components.

UCARCIDETM 15 Antimicrobial should be added at the application rates described below, to a water treatment system at a convenient point of uniform mixing such as the basin area. Addition may be made intermittently (SLUG DOSE) or continuously. Badly touled systems can be shock treated with UCARCIDETM 15 Antimicrobial Under these conditions, blowdown should be discontinued for up to 24 hours

UCARCIDETM 15 Antimicrobial can be used in industrial process water systems that contain ultra filtration units and non-medical reverse osmosis membranes (where approved for compatibility by the membrane manufacturer) and associated distribution systems.

## INTERMITTENT (SLUG DOSE) METHOD

Initial Dose: When the system is noticeably fouled, apply 4.1 to 8.2 fluid ounces of UCARCIDE TM 15 Antimicrobial per 100 gallons of water in the system. Repeat until control is achieved

Subsequent Dose: When microbial control is evident, add 1.6 to 4.1 fluid ounces of UCARCIDE TM 15 Antimicrobial per 100 gallons of water in the system weekly, or as needed to maintain control. Badly fouled systems must be cleaned before treatment is begun.

## CONTINUOUS FEED METHOD

Initial Dose: When the system is noticeably fouled, apply 4.1 to 8.2 fluid ounces of UCARCIDETM 15 Antimicrobial per 100 gallons of water in the system.

Subsequent Dose: Maintain this treatment level by starting a continuous feed of 0.8 to 4.1 fluid ounces of UCARCIDETM 15 Antimicrobiatilizer 100 gattons of water in the system per day Badly fouled systems must be cleaned before treatment is begun.

SERVICE WATER AND AUXILIARY SYSTEMS UCARCIDE<sup>TM</sup> 15 Antimicrobial should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point that will allow for uniform mixing throughout the system.

#### HEAT TRANSFER SYSTEMS

(Evaporative Condensers, Dairy Sweetwater Systems, Hydrostatic Sterilizers and Retorts, and Pasteurizers and Warmers and Once-Through Cooling Water Systems)

UCARCIDETM 15 Antimicrobial should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point of uniform mixing such as a ba-sin area, sump area or other reservoir or collacting area from which the treated water will be circulated uniformly throughout the system

### INDUSTRIAL WASTEWATER SYSTEMS

(Wastewater Systems, Wastewater Sludge and Wastewater Holding Tanks)

UCARCIDETM 15 Antimicrobial should be added to a wastewater system or sludge at a convenient point of uniform mixing such as the digester. Add 1.4 to 7.2 gallons (1500 to 7,500 ppm UCARCIDE TM 15 Antimicrobial) per 1,000 gallons of wastewater or sludge.

#### MACROFOULING CONTROL Not for use in the state of California

UCARCIDETM 15 Antimicrobial should be added continously to maintain a level of 20 ppm active ingredient in the system for a period of at least 96 hours. Initial Dose: When macrofouling is present in the system, apply 16.3 fluid ounces of UCARCIDETM 15

Antimicrobial per 1,000 gallons of water in the system. Continue to add as needed to maintain the 20 ppm active ingredient level for a period of at least 96 hours.

BEET SUGAR MILLS AND BEET SUGAR MILL PROCESS WATER SYSTEMS UCARCIDETM 15 Antimicrobial should be added to the system at a point of uniform mixing such as the diffuser, transport water pump, weir box, or diffuser feed water pump. Additions may be made intermittently (SLUG DOSE) or continuously.

## INTERMITTENT (SLUG DOSE) METHOD

Initial Dose: When the system is noticeably contaminated, add 19.6 to 49.1 fluid ounces (667 to 1,667 ppm product) of UCARCIDETM 15 Antimicrobiall per ton or 640 to 1.600 mL of UCARCIDETM 16 Antimicrobial per metric ton of sliced beets as a slug dose. Repeat until control is achieved Subsequent Dose: When microbial control is evident, add 2.94 to 29.4 fluid ounces (96 to 960 ppm)

of UCARCIDETM 15 Antimicrobial per ton or 96 to 960 mL of UCARCIDETM 15 Antimicrobial per metric ton of sliced beets in the system as a slug dose as necessary to maintain control. The total should not exceed 350 gallons per 1,000 tons of beets sliced per day.

### CONTINUOUS FEED METHOD

Initial Dose: When the system is noticeably contaminated, add 19.6 to 49.1 fluid ounces/minute (667 to 1,667 ppm product) of UCARCIDETM 15 Antimicrobial per ton or 640 to 1,600 mL/minute of UCARCIDETM 15 Antimicrobial per metric ton of beets sliced per minute in the system via automatic pump of suitable construction.

Subsequent Dose: When microbial contro is evident, add 2.94 to 29.4 fluid ounces/minute (100 to 1,000 ppm) of UCARCIDE<sup>TM</sup> 15 Antimicrobial per ton or 96 to 960 mL/minute of UCARCIDE<sup>TM</sup> 15 Atimicrobial per metric ton of beets sliced per minute in the system, or as necessary to maintain control. The total should not exceed 350 gallons per 1,000 tons of beets sliced per day.

## PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS

UCARCIDE TM 15 Antimicrobial should be added to the paper making system at a poin, of uniform mixing such as the beaters, broke chest pump, save-all tank, or white-water tank.

Initial Dose: When the system is noticeably contaminated, add 1.7 to 9.9 lbs of UCARCIDE TM 15 Antimicrobial per ton of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved. Heavily fouled systems should be boiled out prior to initial treatment.

Subsequent Dose: When microbial control is evident, add 1.0 to 6.6 ibs of UCARCIDE TM 15 Antimicrobial per ton of pulp or paper (dry basis) as a slug dose as necessary to maintain control

## PIGMENTS AND FILLER SLURRIES FOR PAPER AND PAPERBOARD

(For use in food contact and non-food contact pigments and filler sturnes)

Use from 0.33 to 2.0 lbs. of UCARCIDE TM 15 Antimicrobial per 1,000 lbs. of dry powder to produce a concentration from 333 to 2,000 ppm as product (based on slurry solids) in the mixed slurry

## WATER BASED COATINGS FOR PAPER AND PAPERBOARD NOTE: For use in non-food contact coatings only.

Use from 0.33 to 2.0 lbs. of UCARCIDE<sup>TM</sup> 15 Antimicrobial per 1,000 lbs. of dry powder to produce a concentration from 333 to 2,000 ppm as product (based on slurry solids) in the mixed slurry.

UCARCIDETN 1 timicrobial should be added to a metalworking fluid system at a point of uniform mixing such as the fluid collection tank. Additions may be made intermittently (SLUG DOSE) at intervals of one week or less.

7 7

initial Dose: When the system is noticeably fouled apply 8.2 to 24.6 fluid ounces (100 to 300 ppm active) of UCARCIDETM 15 Antimicrobial per 100 gallons of metalworking fluid to the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 3.3 to 16.4 fluid ounces (40 to 200 ppm active) of UCARCIDETM 15 Antimicrobial per 100 gallons of metalworking fluid to the system weekly, or as needed to maintain control. Badly fouled systems should be cleaned before treatment begins

## WATER BASED CONVEYOR LUBRICANTS

(Brewary, Juice, Dairy, Beverage, and Food Processing Systems)

Avoid contamination of food in application of product.

Thoroughly clean all tracks and conveyors to remove gross soil. Rinse well. Use an automatic (50 to 300 ppm active) of UCARCIDE<sup>TM</sup> 15 Antimicrobial per 100 gallons of diluted lubricant.

## GENERAL PRESERVATIVE USE

UCARCIDE<sup>TM</sup> 15 Antimicrobial is recommended for use in aqueous or water containing products and systems, including industrial, institutional and consumer in-can processes and products, to control the growth of bacteria and fungl. For effective preservation, add UCARCIDE TM 15 Antimicrobial to the product formulation at a rate of 0.066% to 0.66% (660 to 6 660 ppm) based on the water content of the product (0.66 to 6.6 lbs UCARCIDETM 15 Antimicrobial per 1,000 lbs water content). Mix uniformly

## PRESERVATIVE FOR CONCENTRATES

For use in concentrates where effective preservation is needed after dilution, add UCARCIDETM 15 Antimicrobial to the product formulation at a rate such that the diluted end-use product will contain 0.066% to 0.66% UCARCIDETM 15 Antimicrobial.

At no time during the preservation process should the level of UCARCIDETM 15 Antimicrobial exceed 5.6%.

### **REVERSE OSMOSIS MEMBRANES**

For effective preservation of reverse osmosis elements (where approved for compatibility by membrane manufacturer), immerse elements in a tank containing 0.66% to 6.6% UCARCIDETM 15 Antimicrobia

UCARCIDE<sup>TM</sup> 15 Antimicrobial UCARCIDE<sup>TM</sup> 15 Antimicrobial can also be added to in-line recirculating systems for preser-vation of installed out-of-service reverse osmosis equipment (where approved for compatibili-ty by membrane manufacturer). Add 0.66% to 6.6% UCARCIDE<sup>TM</sup> 15 Antimicrobial to the tank in the circulating system. Maintain the concentration of UCARCIDE<sup>TM</sup> 15 Antimicrobial by periodic addition to counteract any system leakage

## CONCRETE ADM/XTURES

For effective preservation of concrete admixtures, add UCARCIDE<sup>TM</sup> 15 Antimicrobial to the product formulation at a rate of 6,660 to 26,700 ppm based on the weight of the admixture (6.7 to 26.7 lbs UCARCIDE<sup>TM</sup> 15 Antimicrobial per 1,000 lbs. concrete admixture). Mix uniformly

## WATER ELOODS

UCARCIDE<sup>TM</sup> 15 Antimicrobial should be added to a water flood system at a point of uniform mixing.

UCAHCIDETM 15 Antimicrobial to the system is noticeably contaminated, add 330 to 16.670 ppm UCAHCIDETM 15 Antimicrobial to the system (0.3 to 16.0 gallons UCARCIDETM 15 Antimicrobial per 1,000 gallons flood water) Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 67 to 16,670 ppm UCARCIDE<sup>TM</sup> 15 Antimicrobial (0.06 to 16.0 galions UCARCIDE<sup>TM</sup> 15 Antimicrobial per 1,000 galions flood water) to the system weekly, or as needed to maintain control.

## DRILLING, COMPLETION, AND WORKOVER FLUIDS

UCARCIDETM 15 Antimicrobial should be added to a drilling fluid system at a point of

uniform mixing such as the circulating mud tank. Initial Treatment: Add 170 to 3,330 ppm UCARCIDE<sup>TM</sup> 15 Antimicrobial (0.7 to 13.4 gallons UCARCIDE<sup>TM</sup> 15 Antimicrobial.per 100 barrels of fluid) to a freshly prepared fluid depending on the severity of contamination.

Maintenance Dosage: Maintain a concentration of 170 to 3,330 ppm UCARCIDETM 15 Antimicrobial by adding 0.7 to 13.4 gallons of UCARCIDETM 15 Antimicrobial per 100 barrets of additional fluid, or as needed, depending on the sevenity of contamination.

### PACKER FLUIDS

UCARCIDETM 15 Antimicrobial should be added to a packer fluid at a point of uniform mixing such as a circulating holding tank. Add 170 to 2,000 ppm UCARCIDETM 15 Antimicrobial (0.7 to 8.1 gallons UCARCIDETM 15 Antimicrobial per 100 barrels of fluid) to e freshly prepared fluid depending on the severity of contamination. Seal the treated packer fluid in the wall between the casing and production tube.

### GAS PRODUCTION AND TRANSMISSION PIPELINES AND SYSTEMS

UCARCIDETM 15 Antimicrobial should be added to a gas production or transmission pipeline via direct injection. The application should be conducted to a sure maximum distri-bution of the UCARCIDETM 15 Antimicrobial through the entire internal surface of the pipe-line. To facilitate application, it may be desirable to dilute the UCARCIDETM 15 Antimicrobial with an appropriate solvent immediately before use. Injections to the system should be weekly, or as needed to maintain control.

#### GAS STORAGE WELLS AND SYSTEMS

Individual Injection wells should be treated with a sufficient quantity of UCARCIDETM 15 Antimicrobial to produce a concentration of 1,670 to 16,670 ppm UCARCIDETM 15 Antimicrobial when diluted by the water present in the formation. Injection should take place before gas is injected (during the summer). Injections should be repeated yearly, or as needed to maintain control.

Individual drips should be treated with a sufficient quantity of UCARCIDE<sup>TM</sup> 15 Antimicrobial to produce a concentration of 670 to 6,670 ppm UCARCIDE<sup>TM</sup> 15 Antimicrobial when diluted by the water present in the drip. Injections should be repeated yearly, or as needed to maintain control

#### HYDROTESTING

Water used to hydrotest pipelines or vessels should contain 330 to 13,330 ppm UCARCIDE™ 15 Antimicrobial (0.3 to 12.8 gallons UCARCIDE™ 15 Antimicrobial per 1,000 gallons water), depending on water quality and length of time the equipment will remain idle

## PIPELINE PIGGING AND SCRAPING OPERATIONS

Add UCARCIDETM 15 Antimicrobial to a slug of water immediately following the scraper (ideally this water volume can be kept to a minimum and contained between the scraper and a trailing pij). Sufficient UCARCIDETM 15 Antimicrobial should be added to produce a con-centration of 0.3 to 3.3% (0.3 to 3.2 gallon UCARCIDETM 15 Antimicrobial per 100 gallons water), depending on the length of the pipeline and the severity of biofouling.
