BLACK FLAG
ANT-ROACH BUG KILLER
with **BAYGON**
for **15-DAY KILLING POWER**
and **DDVP** for **VAPORIZING ACTION**

NET 16 FL. OZ. (1 PT.) **CAUTION - KEEP OUT OF REACH OF CHILDREN**

ACTIVE INGREDIENTS: o-Isopropoxyphenyl methylcarbamate** 0.50%, DDVP 0.20%, (2,2-dichloro vinyl dimethyl phosphite 0.16%, and 0.014% related compounds).
INERT INGREDIENTS: 99.30% **U.S. Patent 3,111,537

BLACK FLAG
ANT and ROACH BUG KILLER
CAUTION - COMBUSTIBLE MIXTURE N.Y.F.D.C. of A. No. 1817

Do not spray into or near open flame. Do not use as a fog spray. Do not allow children or pets on treated areas until dry.

Harmful if swallowed, inhaled or absorbed through skin. If swallowed, induce vomiting with 1 tablespoon salt in warm water—call physician immediately—atropine is antidote. Avoid breathing spray mist and contact with skin, eyes and clothing. Provide adequate ventilation of area being treated. Do not apply to humans, pets or contaminate food, foodstuffs, dishes or utensils. Wash thoroughly with soap and water after use. Remove birds and cover fish bowls when spraying. Avoid excessive wetting of plastic, vinyl or asphalt tile floor surfaces. Store in a cool place not above 100°F. Keep out of reach of children.

Contains BAYGON for fast, long-lasting killing action. Starts killing on contact. Insect killing power lasts for weeks. Effective against certain crawling insects including those resistant to certain chlorinated hydrocarbon and phosphate insecticides.

DIRECTIONS: (Spray or paint surfaces until damp)
Thorough applications produce a coating which will vaporize into cracks and crevices and into the room for insect control. If reinfestations occur, repeat applications as necessary.

ROACHES, RESISTANT ROACHES, WATERBUGS, CRICKETS AND CENTIPEDES: Thoroughly treat cracks and crevices, baseboards, underneath chairs, tables, kitchen shelves, cupboards, sinks, refrigerators, around garbage containers and other places where insects habitate.

ANTS: Treat ant trails, around door sills and window frames and other places where ants may enter. Apply directly to ant hills. Spray directly on swarming ants, outdoors only.

CLOVER MITES, SOYBEAN AND EARWIGS: Spray window sills and other points of entry. Apply to outside foundation and porches to ground level.

FLIES, MOSQUITOES, GNATS, WASPS: Apply on screens, walls, door and window frames, light fixtures and other outdoor surfaces, where insects congregate.

PAPER NEST WASPS AND MUD DAUBERS: Apply a wet spray to the nests after dark when all pests have returned to their nests.

SCORPIONS, SPIDERS: Spray directly on pests when possible. Treat surfaces of garages and out buildings where pests hide or congregate. Spray points of entry such as window sills and along crevices.

SILVERFISH, FIREBRATS: Apply to cracks, baseboards, behind shelving, bookcases and other storage areas.

BROWN BOB TICKS: Thoroughly spray cracks, crevices and areas where pets normally lie down. Do not spray on pets. Allow the sprayed areas to dry thoroughly. Replace bedding before permitting use by animals. For dog kennels, apply to outside runways, window sills and ledges.
