TO KILL HOUSE PESTS

FLYING INSECTS

House flies, mosquitoes, and other flying insects can be killed by spraying directly on them. For best results, spray in the early morning or late evening when the insects are most active.

CRAWLING INSECTS

Crawling insects such as beetles, cockroaches, and crickets can be killed by spraying directly on them. For best results, spray in the early morning or late evening when the insects are most active.

ANTS

FOR GARDEN PESTS

For garden pests, spray directly on the plants. For best results, spray in the early morning or late evening when the insects are most active.

OUTDOOR AREAS

For outdoor areas, spray directly on the ground. For best results, spray in the early morning or late evening when the insects are most active.

ACTIVE INGREDIENT

1,1-Dichloro-2,2-bis(4-chlorophenyl)ethane

INERT INGREDIENTS

Water, Propylene Glycol, and other inert ingredients
