

HARD WATER CLEANING STRENGTH

Sani-Flush®

CLEANS, DISINFECTS AND DEODORIZES!

SANI-FLUSH has an exclusive formula with blue "bubbling action" and hard water cleaning strength to remove hard water stains, rust and stubborn bowl deposits. Disinfects and kills most household germs fast—even staph and odor-causing germs. Leaves bowl hygienically clean and sanitary.

TO CLEAN AND DISINFECT—Flush toilet to wet bowl. Shake ½ cup of Sani-Flush around the bowl sides and in the water. Let stand until foam is gone. Brush or swab all surfaces thoroughly before flushing. Many household germs are dead. Repeat twice weekly for thorough cleanliness.

TO REMOVE STUBBORN BOWL STAINS—For hard water stains and incrustations, follow steps above. Then pour Sani-Flush freely over remaining stains and in water. Let stand for several hours or overnight. Brush thoroughly and flush. This procedure also cleans trap or outlet which cannot be reached by brush.

Regular use of Sani-Flush keeps white or colored bowls stain free, sanitary, sparkling and bright. Sani-Flush should be used for toilets only. Do not use on bathtubs, sinks, or any other enameled or metal fixtures. Safe for porcelain toilets, plumbing and septic tanks. Contains no phosphates.

In-between cleanings, use Sani-Flush Liquid or Solid Automatic for continuous cleaning and deodorant action.

DANGER: CONTAINS SODIUM BISULFATE • HARMFUL IF SWALLOWED
Damaging to eyes. Irritating to skin. Keep out of reach of Children. Do not get in eyes, on skin or clothing. Do not use with chlorine type bleaches, as harmful fumes may result. Do not reuse container. Destroy when empty.

FIRST AID—EXTERNAL—Flood the surface with water, using soap freely, then cover with moist Magnesia or Baking Soda. If splashed in eyes, wash thoroughly with water. CALL PHYSICIAN.

FIRST AID—INTERNAL—Give Milk of Magnesia, chalk or whiting suspended in much water, milk or raw egg white. CALL PHYSICIAN.

KEEP IN DRY PLACE • REPLACE CAP PROMPTLY AFTER USING
