 Do not breathe dust. Work in a well-ventilated room. Avoid contact with skin and eyes. Wash thoroughly after handling. Do not contaminate food or feed.

NOT FOR USE OR STORAGE IN OR AROUND THE HOME.

BURY WASTE AND EMPTY CONTAINER IN A SAFE PLACE.

OBSERVE THE FOLLOWING USE PRECAUTIONS

Read all label directions before using and use only as specified on this label.

Dispose of excess treated seed by burial.

FISH AND WILDLIFE CAUTIONS: This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate any body of water by cleaning of equipment or disposal of wastes. Birds feeding on treated seeds may be killed.

IMPORTANT: Treated seed must not be used for human consumption nor as animal feed. Bags containing treated seed should be labeled:

TREATED SEED. DO NOT USE FOR FOOD, FEED OR OIL PURPOSES.

The Federal Government and some States have issued regulations for the application of special tags or labels to be affixed to bags containing treated seed. Further specific information on this subject may be obtained from State Agricultural Experiment Stations or the State Agricultural Extension Service.

DIRECTIONS FOR USE

DRY TREATMENT: This formulation can be used in the dry powder form for dust treatment of seeds. Mix seed with recommended amount of this material, in any commercial seed treater or barrel treater, until thoroughly coated.

SLURRY TREATMENT: Pre-mix the recommended amount of this material with a little water in a bucket and make a thin paste. Stir this paste into the required amount of water for the slurry treater equipment to be used.

NOTE: Seed treated by the slurry method should not be bagged until such time as the seed has had an opportunity to dry. Store in well ventilated areas. If seed is bagged when wet, heat is developed and impairs seed germination. Avoid lengthy storage of treated seed to prevent loss of Lindane.

RECOMMENDATIONS

LINDANE 75 SEED PROTECTANT is a special formulation recommended for temporary protection of Seeds and Seedlings from damage of Seed Corn Beetles, Seed Corn Maggots and Wireworms. LINDANE 75 SEED PROTECTANT should not be used alone for the treatment of seeds, but should be combined with a suitable fungicide such as Stauffer CAPTAN 65 SEED PROTECTANT or Stauffer CAPTAN 75 SEED PROTECTANT.

If soil temperature is extremely high due to low moisture, hot weather or mid-summer planting time, reduce the following dosage rates by one-half.
