PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Causes irreversible eye damage. Harmful if swallowed or inhaled. May cause allergic skin reactions. Do not get in eyes. Wear goggles or face shield when handling. Avoid contact with skin and clothing. Avoid inhalation of dust. Remove and separately launder clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. In the event that treated seeds are spilled and cannot be salvaged, completely cover them with soil.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CAPTAN 75 SEED PROTECTANT is a microfine wettable powder especially formulated for the treatment of seed, prior to storage and planting, to protect seed from molds and other fungi causing storage loss and to protect seed from seed-borne and soil-borne fungi which cause seed decay and seedling blights.

COMPATIBILITY: CAPTAN 75 SEED PROTECTANT can be used in combination with most commonly used seed protectants, both insecticides and fungicides, as well as fertilizers. Do not use with strongly alkaline materials.

PLANT SAFETY: At the recommended dosage CAPTAN 75 SEED PROTECTANT is non-injurious from the standpoint of seed injury or yield reduction. The germination of treated seed is frequently stimulated, giving a superior result as compared to results from other seed fungicides.

USE PRECAUTIONS:

BEST AVAILABLE COPY

Read all label instructions before using and use only as specified on this label.

Wear goggles or face shield when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and separately launder clothing before reuse.

A dust mask must be worn when mixing and loading this product.

Mixers/loaders when mixing and loading this product must wear a long sleeved shirt and long pants or a coverall that covers all parts of the body except the head, hands and feet. Wear chemical resistant gloves, goggles or a face shield and a chemically resistant apron.

Fieldworkers and harvesters must wear chemical resistant gloves. Leather or fabric gloves are not acceptable.

AFTER WORK: Take off all clothes and shoes. Shower using soap and water. Do not wear contaminated clothing. Wash protective clothing and equipment with soap and water after each use. Personal clothing worn during use must be laundered separately from household articles. Clothing and protective equipment heavily contaminated or drenched with captan must be destroyed according to state and local regulations.

SPECIAL USE PRECAUTIONS:

IMPORTANT: Treated seed must not be used for human consumption nor for animal feed.

The Federal Government and most States have seed laws or regulations requiring that an appropriate caution statement be affixed to bags containing treated seeds, such as:

Treated Seed

Do Not Use for Feed, Food, or Oil Purposes.

SLURRY TREATMENT: Pre-mix the recommended amount of this material with a little water in a bucket and make a thin paste. Stir this paste into the required amount of water for the slurry equipment to be used.

NOTE: Seed treated by the slurry method should not be bagged until such time as the seed has had an opportunity to dry. Store in well ventilated areas. If seed is bagged when wet, heat is developed and impairs seed germination.

RECOMMENDATIONS:

For control of many seed rots, seedling rots, root rots, fungi and kernel smut of sorghum.
