3-7-1972

1/1

IMIDAN 50-WP
(EPA Reg. No. 476-1917)

Amended label claim for peaches
(Accompany's 8/16/71 Application for
Amended Registration)

PEACHES: Oriental fruit moth, peach twig borer, plum curculio

Apply 1 to 1-1/2 lbs Imidan 50-WP per 100 gallons of water (or a maximum of 6 lbs per acre per application) as a full cover spray. Use 1-1/2 lbs per 100 gallons water for plum curculio. Repeat as necessary in accordance with insect infestations and local or state spray programs. Usually suppresses European red and two spotted mites when used in a seasonal program. Do not apply within 14 days of harvest.
