

FIELD AND FORAGE CROPS (continued)

Corn (Forage and Fodder)

Control these insects with the following dosage:

1 to 2 pounds active SEVIN per acre

Corn earworm	Sap beetles
Corn rootworm adults	Japanese beetle
European corn borer	Flea beetles
Fall armyworm	<u>Leafhoppers</u>

Notes

When label directions for use are followed, corn residue may be used for forage or fodder. SEVIN may be applied up to and including the day of harvest. (Allowable tolerance of 100 ppm.)
