

CAPTAN-THIODAN® 7.5-3 DUST

AGRICULTURAL INSECTICIDE AND FUNGICIDE

ACTIVE INGREDIENTS

Captan - N-[trichloromethyl]thio]-4-cyclohexene-1,2 dicarboximide 7.5%

Endosulfan* 3.0%

INERT INGREDIENTS: 89.5%
100.0%

Not required for use in countries where valid patent rights exist.
* Endosulfan is a registered trademark of G.D. Searle & Co., Inc.
Thiodan is a registered trademark of Canadian Hoechst Ltd. Patent No. 1,199,561.

CAUTION

Keep Out of Reach of Children

HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN
Avoid breathing dust.
Avoid contact with skin, eyes or clothing.
In case of contact with skin or eyes, flush with plenty
of water; for eyes, get medical attention.
Wash with soap and water after handling and before eat-
ing or smoking; wear clean clothing.
Avoid contamination of feed and food.

OBSERVE THE FOLLOWING USE PRECAUTIONS

Protect children from exposure until treated areas have
been thoroughly washed.

Do not apply to fruit bearing trees, shrubs, vines, flowers or
foliage until the fruit is well developed and the flower
is past the bloom stage. The grower is responsible for the use of this
product in accordance with directions on the label. If any
questions arise concerning the use of this product, consult
the manufacturer or distributor.

BURN EMPTY RAG—KEEP OUT OF SMOKE

DIRECTIONS FOR USE

Apply when air is calm, using ground equipment or aircraft. Make thorough coverage of plants
with a uniform deposit of dust. Apply at first sign of infestation and repeat at regular inter-
vals when needed to maintain control, but observe use limits given for specific crops.

For the control of disease persisting after the prescribed time limits have expired, an
effective fungicide should be used alone in a manner which will not leave residue in
excess of established tolerance.

CAUTION: Workers entering treated areas the day of application should wear protective
clothing.

RECOMMENDATIONS

CUCUMBER, PUMPKIN, SUMMER & WINTER SQUASH: Angular leaf spot,
anthracnose, downy mildew, aphids, cucumber beetle, striped
cabbage flea beetle, squash vine borer. Apply 33 lb. per
acre. For squash vine borer control, apply weekly to flower
buds, stems and vines beginning when mites first appear. May
be applied up to day of harvest.

POTATOES: Early & late blight, aphids, European corn borer,
Colorado potato beetle, false chinch bug, flea beetle, green
stink bug, leafhopper, leaf-footed plant bug, potato psyllid
potato tuberworm, three-lined potato beetle, Southern army-
worm. Apply 3-6 lb. per acre. Repeat as needed.

STRAWBERRIES: Fruiting set, leafhopper, strawberry
aphid. Apply 33 lb. per acre. Do not apply within 4 days of
picking. Do not apply at intervals of less than 15 days or
more than twice during any 30-day period if fruit is present.
