WARNING

STATEMENT OF PRACTICAL TREATMENT

If poisoning occurs or is suspected, immediately start the recommended procedures below and simultaneously contact a physician, the nearest hospital, or a poison control center for advice.

NOTE: Be sure to advise the physician that the compound is a cholinesterase inhibitor and follow his or her advice.

If swallowed, immediately dilute the swallowed material by giving large quantities of water and induce vomiting by gagging the victim with a finger placed at the back of the victim's tongue. Continue fluid administration until vomitus is clear. Never give anything by mouth to an unconscious person. Obtain medical attention immediately.

In case of contact, immediately flush eyes or skin with plenty of water for at least fifteen minutes while removing contaminated clothing and shoes. For eyes, hold eyelids apart during the flushing to insure rinsing of the entire surface of the eye and lids with water and get medical attention immediately. Wash contaminated clothing before re-use.
