STRAWBERRIES

ANTHRA CYANIDE WEEDS
 Anthracnose is a common fungal disease of many crops. It is caused by the fungus *Colletotrichum* spp. The disease is characterized by dark, sunken lesions on the leaves, stems, and fruits of the plant. The lesions are often elongated and have a dark, necrotic center. Anthracnose can cause significant damage to the plant, especially if it is not treated. The disease is most common in warm, humid climates. It can be spread by wind, rain, and insects. The disease can be prevented by using resistant varieties, proper irrigation, and fungicides.

On 25/01/2017, data was collected from the following locations:

TOBACCO (Frans; Arab.)
Tobacco (Frans; Arab) also known as tobacco leaf or tobacco
rate on tobacco is calculated by the amount of tobacco used in the

2-E

ENVIRONMENTAL CAUTIONS

- Keep out of lakes, streams, and ponds.
- Do not apply near water bodies. Do not allow runoff to reach water.
- Apply only as directed on label.

DEVIRINOL 2-E/TILLAM® 6-E Tank Mix Combination

A tank mix combination of DEVIRINOL 2-E and TILLAM 6-E can be applied and mixed incorporated into the soil before planting for weed control in tomatoes and tobacco.

IMPORTANT

Observe all cautions and instructions of all products used in combination.

Make only one application per season.

In each case where a range of rates is given the lower rates should be used on light sandy textured soils and the higher rates on heavy textured soils.

After harvest or during planting of succeeding crops a deep incorporation of soil and operation must be carried out.

Do not seed to a fallow, small grains, sorghum, corn, lettuce or sugarbeets for 12 months after application of the DEVIRINOL 2-E/TILLAM 6-E tank mix.

Weeds Controlled

The tank mix is recommended for control of the following weeds:

ANNUAL GRASSES

Barnyardgrass-Watergrass
(Echinochloa spp.)
Bermudagrass (Cynodon dactylon)
Crabgrass (Digitaria sp.)
Foxtail (Setaria sp.)
Goosegrass (Eleusine indica)
Millet (Setaria sp.)
Sorghum (Sorghum sp.)
Wheatgrass (Triticum sp.)

ANNUAL BROADLEAF WEEDS

Black-eyed Susan-Sweet Suzy
(Rudbeckia serotina)
Common Purslane (Portulaca oleracea)
Deadnettle (Henbit ulmarum) and other
Florida Pusley (Richardia scabra)
Mary's Nightshade (Solanum elaeagnifolium)
Lambquarters (Chenopodium album)
Nettle (Urtica dioica)
Prostrate Pigweed (Amaranthus prostratus)
Rabbit Footed (Amaranthus retrofractus)
Shepherdspurse (Cassia torilis)

PERENNIAL WEEDS

Yellow Nutsedge (Cyperus esculentus)
Purple Nutsedge (Cyperus rotundus)

Erasing stands of nutgrass must be turned under and chopped up thoroughly before treatment.

Directions for Use

The recommended tank mix controls weeds by interfering with normal seed germination and seedling development. It does not control established weeds. All weed growth and crop stalks should be thoroughly worked into the soil before treatment.

TANK MIXING DIRECTIONS

Be sure the sprayer tank, pump and nozzle have been thoroughly flushed with clean water if another pesticide has been used previously.

Sufficient jet or mechanical agitation should be provided during the filling operation and during application. Fill the spray tank at least one-fourth full of clean water and an agitator or pump and agitator are running and the recommended amounts of herbicides to the tank. Fill the tank with water to the desired level. Do not allow the mixture to stand in the spray tank without agitation.

Allow the pump to run several minutes before application to insure proper suspension and mixing. The tank mix should not be left in the spray tank for prolonged periods. Batches should be mixed and applied the same day.

APPLICATION DIRECTIONS

The soil should be well worked and dry enough to permit good soil mixing and incorporation. Pour the recommended amounts of DEVIRINOL 2-E and TILLAM 6-E into the spray tank during the filling operation. Apply 25 to 50 gallons of water per acre.

For soil incorporation application use a properly calibrated low-pressure boom type sprayer having good agitation.

In irrigated areas do not apply before pre-irrigation. For a band application reduce dosage proportionately depending upon row spacing and band to be treated. Do not use in rocky ground because thorough incorporation is not possible.

INCORPORATION DIRECTIONS

The herbicides must be mixed/incorporated into the soil IMMEDIATELY after application to prevent loss by evaporation. Whenever possible application and incorporation should be done in the same operation.

INCORPORATION BEFORE PLANTING

Use power-driven cultivation equipment set to cut to a depth two to three inches in loose soils and three to four inches in heavy soils OR a tandem disc set to cut to a depth of 4 inches followed by a spike-toothed harrow or some other leveling device which extends beyond ends of the disc. For thorough mixing disc in two different directions across disc.

INCORPORATION AT PLANTING

Use power-driven cultivation equipment set to cut to a depth of two to three inches OR on coarse soils only ground driven tillage cultivators, rotary hoe, row wheels, etc. set to cut to a depth of 1 1/2 inches and operated at 6 to 8 mph. When using ground driven tillage cultivators if soil is crusted.

PLANTING

Crops should be planted 10 to 15 minutes after application and incorporation. Do not use a flag behind the planter as this may interfere with the herbicide and the seed row and cause soil crusting.

CULTURAL PRACTICES FOLLOWING APPLICATION

Soil cultivation after planting should be deferred as long as possible to avoid soil crusting and as long as the weeds are not growing. If weeds are growing, do not use a flag behind the planter as this may interfere with the herbicide and the seed row and cause soil crusting.

When cultivating for soil crusting, use a light disc or a light harrow. Do not use a heavy disc or a heavy harrow.

Recommendations

TOMATOES

Apply 1/2 lb. of DEVIRINOL 2-E and 1/2 lb. of TILLAM 6-E per acre. Apply 25 to 50 gallons of water per acre. Use the recommended amounts of herbicides to the tank. Fill the tank with water to the desired level. Do not allow the mixture to stand in the spray tank without agitation.

TOBACCO

Before transplanting apply 1/2 lb. of DEVIRINOL 2-E and 1/2 lb. of TILLAM 6-E per acre. Apply 25 to 50 gallons of water per acre.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool dry place. Do not store below 20° F. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide spray mixture or residue that cannot be used according to later instructions may be disposed of according to Federal, State or local procedures under the Resource Conservation and Recovery Act.

CONTAINER DISPOSAL: Triple rinse (or equivalent) offer for recycling or by other approved disposal of in a sanitary landfill or by other approved State and local procedures.
