SUPPLEMENTAL LABEL DIRECTIONS
OR INJECTION WITH ANHYDROUS AMMONIA

SUTAN+ 6.7-E

Selective Herbicide-Fertilizable Liquid for Corn (Field, Sweet,
Silage and Popcorn)

Contains 6.7 Pounds of Active Ingredient Per Gallon.
EPA Reg. No. 476-2156

INJECTION DIRECTIONS FOR SUTAN+ 6.7-E WITH ANHYDROUS AMMONIA

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For pre-emergence soil injection applications of anhydrous ammonia, on conservation or conventional tilled acreage, SUTAN+ 6.7-E can be introduced into the anhydrous line using a metering pump which offers a constant rate of SUTAN+ 6.7-E output per acre independent of the anhydrous ammonia output rate. The SUTAN+ 6.7-E discharge hose should tee into the ammonia discharge line between the meter and the manifold. For best results, SUTAN+ 6.7-E must be used at rates of 4-3/4 to 7-1/3 pints per acre, injection shanks must be spaced at 8 to 10 inch intervals, and injection depth must be 4 to 5 inches. Spacings greater than 10 inches up to 15 inches will require a cross discing to achieve acceptable weed control. Do not inject at spacings greater than 15 inches as weed control may be unacceptable. A minimum rate of 125 pounds per acre of anhydrous ammonia is recommended.

Weed control will be inadequate if the SUTAN+ 6.7-E is injected more than 4 to 5 inches below the soil surface. Soil injections at less than a 4 inch depth may result in some loss of the anhydrous ammonia through the soil surface.

NOTE: Atrazine and Bladex* have little lateral movement in the soil and injections with anhydrous ammonia will give only a narrow band of broadleaf weed control. These products may be surface applied and incorporated at the same time the SUTAN+ 6.7-E and anhydrous ammonia are injected or post-emergent applications of recommended broadleaf herbicides may be used.

All applicable recommendations, directions, restrictions, and precautions on the EPA-registered label are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.

SUTAN and SUTAN+ are Registered in the U.S. Patent and Trademark Offices.
SUTAN is a Registered Trademark of Shell Chemical Company

NOTICE-READ CAREFULLY

CONDITIONS OF SALE: Stauffer (and seller) offer(s) this product for sale subject to, and buyer and all users are deemed to have accepted, the following conditions of sale and warranty which may only be varied by written agreement of a duly authorized representative of Stauffer.

WARRANTY LIMITATION: Stauffer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use on the label subject to the inherent risks referred to below. Stauffer makes no other express warranties; THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY and there are no warranties which extend beyond the description on the label hereof.

INHERENT RISKS: The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks associated with use. Buyer assumes all risks associated with use or application of this product contrary to label instructions or resulting from extraordinary weather conditions.

LIMITATION OF LIABILITY: In no case shall Stauffer be liable for special, indirect or consequential damages resulting from the use or handling of this product and no claim of any kind shall be greater in amount than the purchase price of the product in respect of which such damages are claimed.

This product is sold only for uses stated on its label. No express or implied license is granted to use or sell this product under any patent in any country except as specified:
