

NOTICE-READ CAREFULLY

CONDITIONS OF SALE: Stauffer (and seller) offer(s) this product for sale subject to, and buyer and all users are deemed to have accepted, the following conditions of sale and warranty which may only be varied by written agreement of a duly authorized representative of Stauffer.

WARRANTY LIMITATION: Stauffer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the directions for use on the label subject to the inherent risks referred to below. Stauffer makes no other express warranties; THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY and there are no warranties which extend beyond the description on the label hereof.

INHERENT RISKS: The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks associated with use. Buyer assumes all risks associated with use or application of this product contrary to label instructions or resulting from extraordinary weather conditions.

LIMITATION OF LIABILITY: In no case shall Stauffer be liable for special, indirect or consequential damages resulting from the use or handling of this product and no claim of any kind shall be greater in amount than the purchase price of the product in respect of which such damages are claimed.

This product is sold only for uses stated on its label. No express or implied license is granted to use or sell this product under any patent in any country except as specified:
Country: United States of America Patent No.: 4,021,224; 4,137,070

SUPPLEMENTAL LABEL DIRECTIONS
FOR INJECTION WITH ANHYDROUS AMMONIA

ERADICANE® 6.7-E

ACCEPTED

DEC 14 1982

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 476-2157

Selective Herbicide-Emulsifiable Liquid for Corn (Field, Sweet,
Silage and Popcorn)

Contains 6.7 Pounds of Active Ingredient Per Gallon.
EPA Reg. No. 476-2157

INJECTION DIRECTIONS FOR ERADICANE 6.7-E WITH ANHYDROUS AMMONIA*

It is a violation of Federal law to use this product in a manner
inconsistent with its labeling.

For pre-emergence soil injection applications of anhydrous ammonia,
on conservation or conventional tilled acreage, ERADICANE 6.7-E can
be introduced into the anhydrous line using a metering pump which
offers a constant rate of ERADICANE 6.7-E output per acre independent
of the anhydrous ammonia output rate. The ERADICANE 6.7-E discharge
hose should tee into the ammonia discharge line between the
meter and the manifold. For best results, ERADICANE 6.7-E must be
used at rates of 4-3/4 to 7-1/3 pints per acre, injection spacings
must be spaced at 8 to 10 inch intervals, and injection depth
must be 4 to 5 inches. Spacings greater than 10 inches up to 15
inches will require a cross discing to achieve acceptable weed
control. Do not inject at spacings greater than 15 inches as
weed control may be unacceptable. A minimum rate of 125 pounds
per acre of anhydrous ammonia is recommended.

Weed control will be inadequate if the ERADICANE 6.7-E is injected
more than 4 to 5 inches below the soil surface. Soil injections
at less than a 4 inch depth may result in some loss of the anhydrous
ammonia through the soil surface.

NOTE: Atrazine and Bladex* have little lateral movement in the soil
and injections with anhydrous ammonia will give only a narrow
band of broadleaf weed control. These products may be surface
applied and incorporated at the same time the ERADICANE 6.7-E
and anhydrous ammonia are injected or post-emergent applica-
tions of recommended broadleaf herbicides may be used.

All applicable recommendations, directions, restrictions, and
precautions on the EPA-registered label are to be followed.

This labeling must be in the possession of the user at the time of
pesticide application.
