Farmrite Lime Sulfur Solution

A fungicide for certain diseases of apples, peaches, plums, raspberries, ornamentals and roses.

ACTIVE INGREDIENTS:

Calcium Polysulfide	- - - - -	29.0%
Calcium Thiosulfate	- - - - -	2.0%
INERT INGREDIENTS:	- - - - -	69.0%

Total - - - 100.0%

Baume 32° at 60° F.

KEEP OUT OF REACH OF CHILDREN

DIRECTIONS

Pour recommended amount of Lime Sulfur Solution into partly filled spray tank and add remainder of water to fill tank. Keep agitator running during filling and spraying operations. For best results, Lime Sulfur Solution should be used alone. Use in cool weather — early spring or fall. Do not use within 10 to 14 days of an oil spray or when temperatures are high.

RECOMMENDATIONS

- 1. PEACHES AND PLUMS: Peach Leaf Curl, San Jose Scale — use 9 gallons per 100 gallons of water. Apply only when peaches and plums are dormant.
- 2. APPLES: Powdery mildew, Leaf spot, Scab—use 2½ gallons per 100 gallons of water. (1 pint in 5 gallons or 6 tablespoonfuls per gallon). Apply when blossoms are breaking and first showing pink. Additional sprays—pink, petal fall and first cover, apply at 2 gallons per 100 gallons of water (5 tablespoonfuls per gallon).
- 3. BOXWOOD: Canker—Remove infected branches down to healthy wood. Use 2 gallons Lime Sulfur Solution per 100 gallons of water. Make 4 applications as follows: 1. As soon as dead leaves are cleaned up in spring. 2. When new growth is about half completed. 3. After spring growth is completed. 4. After fall growth is completed.
- 4. ROSES: Anthracnose—use 10 to 12 gallons per 100 gallons of water (1 pint per gallon). Apply when bushes are dormant. Powdery mildew—use 2 gallons per 100 gallons of water (1 pint per 6 gallons). Make first application when buds break in the spring, followed by 2 to 3 applications at 7 to 10 day intervals.
- 5. RASPBERRIES: Anthracnose, Cane and Spur blight, Rose scale—use 12 gallons per 100 gallons of water applied in delayed dormant when buds begin to break and show silver.
