## CAUTION

KEER OUT OF REACH OF CHILDREN

100.00%

Harmful is swallowed. If accidently Ingested Do Not Induce Vomiting.

Do not contaminate water by cleaning of equipment, or disposal of wastes.

#### **DIRECTIONS**

Pour the recommended amount of this material into partly filled spray tank. Add remainder of water to fill tank. Keep agitator running during filling and spraying operations. If this material does not mix with water but tends to separate quickly into an oily layer, do not use as a spray as damage to plants may result. Keep oil container closed during storage. Spray only when temperature is above 40° F, and there is no danger of freezing. Do not use with any kind of sulfur.

When using this product on fruit trees in combination with the listed organic phosphates, be sure to follow the proper directions and limitations for use appearing on the labels of these products.

Do not exceed maximum rate or apply later than recommended.

### RECOMMENDATIONS

APPLES: Dormant Spray - Apple Red Bug, European Fruit, Lecanium Scale, use 2 gallons Superior Oil in 100 gallons water. Fruit Tree Leaf Roller, use 3 gallons in 100 gallons of water. Green Tip to Delayed Dormant 1/2" Green - European Red Mite, use 2 gallons Superior Oil in 100 gallons of water. Delayed Dormant 1/2" Green - San Jose Scale, use 2 gallons Superior Oil in 100 gallons water. Scurfy Scale, use 3 gallons in 100 gallons water.

PEARS: Dormant Spray - Fruit Tree Leaf Roller, Pear Leaf Blister Mite, use 3 gallons of Superior Oil in 100 gallons of water. Late Dormant - Pear Psylla, use 2 gallons in 100 gallons of water.

PEACHES: Dormant Spray - Cottony Peach Scale, use 3 gallons of Superior Oil in 100 gallons of water.

PLUMS, PRUNES: Dormant to Delayed Dormant 1/2" Green - European Red Mite, European Fruit, Lecanium Scale, use 2 gallons of Superior Oil in 100 gallons of water.

Consult state extension recommendations for suitable fungicide to use in the spray mixture.

Do not apply oil within 12 to 14 days of sulfur or within 7 days Captan.

ORNAMENTALS: Scale Insects, Aphids, Mites – use 2 to 3 gallons of Superior Oil in 100 gallons of water (1 pint per 4 gallons of water) for some deciduous plant materials strictly in the dormant stage and after danger of freezing has passed. Do not apply to Walnut, Beech, Hickory, Butternut, Sugar and Japanese Maples. Evergreens tend to be susceptible to injury. Use extreme caution. Consult state extension authorities for specific recommendations.
