FARMRITE POTATO SEED DUST
(Contains Dithane M-45)

ACTIVE INGREDIENTS:

100% Dithane M-45, a product of zinc and manganese ethylenebisdithiocarbamate
INERT INGREDIENTS: -----

Net 100 lbs.

CAUTION - 12 point type

KEEP OUT OF REACH OF CHILDREN (12 point type)

May cause irritation of nose, throat, eyes and skin. Do not breathe dust or spray mist. In case of skin contact wash with water; for eyes, wash copiously with water and get medical attention. Do not reuse containers. Destroy by burying with waste.

Contamination of fish-bearing waters with this product may harm fish.

Important: Keep away from fire and sparks. Store in a cool, dry place. Do not allow to become wet or overheated in storage. This may bring on chemical changes which will impair the fungicidal effectiveness of Dithane M-45 and may also generate flammable vapors. Keep container closed when not in use.

RECOMMENDATIONS

Farmrite Potato Seed Dust is a special fungicide dust formulation for application on whole or cut potato tubers to protect them from seed-piece decay caused by *Fusarium sambucinum*.

DIRECTIONS FOR USE

Use 1 lb. of Farmrite Potato Seed ^{Dust} per 100 lbs. of whole or cut potato seed-piece. Apply the dust in a manner such that the entire surface of the seed-piece becomes thoroughly covered with the fungicide dust. Plant seed as soon after treatment as possible. Do not use treated seed potatoes for food or feed purposes.
