REAL-KILL

ROSE & GARDEN INSECT SPRAY REFILL

FOR INSECT CONTROL ON ORNAMENTALS, VEGETABLES, AND FLOWERING PLANTS

ROSES AND ORNAMENTALS such as Azaleas, Chrysanthemums, Asters, Marigolds, Petunias, Nasturtiums, Gladioli, Salvia, Dahlias, Delphiniums, Iris, Snapdragons, and other flowering plants; evergreens, and deciduous shrubs and vines.

TO CONTROL: Aphids, Spider Mites, Thrips, White Flies, Rose Chafers, Climbing Cutworms, Leaf Hopper Nymphs, Japanese Beetles, Lace Bugs and Lygus Bugs.

VEGETABLES: Tomatoes, beans, cabbage, potatoes, corn, peas, cucumbers and peppers.

TO CONTROL: Aphids, Bean Leaf Beetles, Corn Ear Worm, Cabbage Worms, Cucumber Beetles, Mexican Bean Beetles, Colorado Potato Beetle, Japanese Beetle.

DIRECTIONS

Pour 8 fluid ounces into REAL-KILL Rose & Garden Insect Spray Gun. (See handy measuring guide on side of label.) Fill spray bottle with water. Replace gun and follow directions on spray bottle label.

Turn adjustable nozzle by rotating to deliver a fine mist, coarse spray or jet stream. A fine mist spray gives best insect control on plants. Begin early—Make first application when insects first appear. Fog with a slow sweeping motion to cover upper and lower leaf surfaces, and stems. For dense growth, spray from both sides. For Corn Ear Worm, set nozzle to stream and spray into corn silk, and make 3 or 4 applications at 2 or 3 day intervals. Reapply immediately after rain.

For best results, spray early in the morning or evening when air is still. Regular light sprayings are better than single heavy treatments. Repeat as necessary, generally at 7 day intervals. Stop use 1 day before harvest. Do not spray when temperature exceeds 90°F.

MONEY-BACK GUARANTEE

Unconditionally guaranteed to give complete satisfaction when used according to directions or your money back. Mail label to REAL-KILL for full refund.

ACTIVE INGREDIENTS: Pyrethrins, 0.105%; *piperonyl butoxide, technical, 0.10%; petroleum distillate, 0.42%.

INERT INGREDIENTS: 99.37%.
