DIRECTIONS:
To unlock and use
the bug gun:

Turn trigger to left to
unlock.

Hold sprayer as shown.
Squeeze trigger with index
and middle fingers.

Turn adjustable nozzle by rotating to deliver a fine
mist, coarse spray or jet stream.

A fine mist spray gives best insect control on plants.
Begin early—Make first application when insects
first appear. Fog with a slow sweeping motion to
cover upper and lower leaf surfaces and stems. For
dense growth, spray from both sides. For Corn Ear
Worm, set nozzle to stream and spray into corn silk,
and make three or four applications at two or three
day intervals. Reapply immediately after rain. For
best results, spray early in the morning or evening
when air is still. Regular light sprayings are better
than single heavy treatments. Repeat as necessary.

generally at 7 day intervals. Stop use 1 day before
harvest. Do not spray when temperature exceeds
90° F.
