

PRECAUTIONARY STATEMENTS

CAUTION

Hazards to Humans and Domestic Animals

Harmful if swallowed or absorbed through skin. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Remove pets, birds and cover fish aquariums before spraying. Do not apply directly to or around food. Cover or remove any food utensils and food processing equipment during application. Do not apply while food processing is underway. After space spraying in areas where food is handled, wash all equipment, benches, shelving, etc. where exposed food will be handled with potable water.

Statement of Practical Treatment

If Swallowed: Call a physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Never induce vomiting or give anything by mouth to an unconscious person. **If on Skin:** Wash contaminated clothing and wash affected areas with plenty of soap and water. **If In Eyes:** Flush eyes with plenty of water. Call a physician if irritation persists. **If Inhaled:** Remove victim to fresh air. Apply artificial respiration if indicated.

Environmental Hazards

This pesticide is highly toxic to fish, birds and other wildlife. Do not apply directly to water or wetlands (swamps, bogs, marshes and potholes). Drift and runoff from treated sites may be hazardous to fish in adjacent waters.

Physical and Chemical Hazards

Contents under pressure. Do not use near heat or open flame. Do not puncture or incinerate. Exposure to temperatures above 130°F may cause bursting.

Storage and Disposal

Storage: Store in a cool place away from heat, direct sunlight, or open flame. Keep in original container and preferably in a locked storage area. **Disposal:** Replace cap and discard container in trash. Do not puncture or incinerate.

The first multi-purpose household insecticide that can be used for:

- Quick kill of specific flying insects and garden pests.
- Up to 3 to 4 week long lasting control against roaches.

Real-Kill®

**INDOOR
OUTDOOR
PLUS**

**KILLS ROACHES UP TO 4 WEEKS
FLYING INSECTS
GARDEN PESTS**

Active Ingredients:

Resmethrin	0.398%
d-trans Allethrin	0.161%
Inert Ingredients: *	99.441%
TOTAL	100.000%

* Contains aliphatic petroleum hydrocarbons.

Keep Out of Reach of Children

Net Contents: 12 oz.

Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **SHAKE WELL.** Hold can upright. **Crawling Bugs:** Roaches, Waterbugs, Spiders. Hold can 18" away and spray baseboards, cracks and crevices, around door and window frames, and other hiding places such as closets, in back of and under appliances, sinks, and cupboards in the kitchen and bathroom. In basements, spray hiding places in cracks and crevices, lower walls and dark places. **Ants:** Apply to ant trails and around door sills, window frames, and other places where ants may enter. **Flying Insects:** House Flies, Mosquitoes, Gnats. **INDOORS:** Close all doors and windows. Pointing nozzle upward and 3-feet away from surfaces, fill the room with mist. Leave the treated area closed for at least 15-minutes. Ventilate the room when treatment is completed. **OUTDOORS:** To reduce annoyance from these flying insects and biting flies, hold can 24-inches from shrubs, bushes, and grassy areas. Spray these areas with a slow sweeping motion at the rate of 3-seconds per cubic yard of space, while moving away from the treated areas. Treat porches, patios, and picnic areas in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary. **Wasps:** Applications should be made in the evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary. Spray directly on wasps that enter building. **Garden Pests:** Aphids, Japanese Beetles, Leaf Hoppers, Thrips, White Flies, Plant Bugs. *Do not use on food crops. For certain ornamental flowers, spray with a slow, sweeping motion 18" from all plants. Avoid wetting - a light spray kills bugs effectively. Spray plants in short bursts and only when air is still and when temperature is below 90°F. Repeat as needed. Use with caution on young plants and new growth. **For These Ornamentals:** Roses, Gladioli, Azaleas, Chrysanthemums, House Plants, Evergreens ... Use with caution on azaleas, junipers, roses, including hybrid tea roses, flowering quince, ash and camellias. These plants may be subject to leaf or flower burn under certain conditions of use. For adult white flies and two spotted mites, be sure to direct spray to contact these pests. Thoroughly cover the infested area. Use several repeat applications at 2-day intervals if necessary. **NOTICE:** Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
