WINRU

PYRENONE[®] OIL SPRAY CONCENTRATE

Winru Pyrenone[®] Oil Spray Concentrate when applied as directed will control exposed stages of the confused flour beetle, cadelle, flat grain beetle, meal worms, dermestids or carpet beetle, roaches, silverfish, Mediterranean flour moth, Indian meal moth and spider beetles.

DIRECTIONS:

Dilute Winru Pyrenone[®] Oil Spray Concentrate at the rate of one gallon concentrate to one gallon of oil and apply this spray directly to floors, walls and other areas where insects are likely to hide. The spray should be applied to cracks and crevices, behind baseboards, door and window trim, beneath machinery and behind cabinets. Every effort should be made to contact the insect directly with the spray application. Spray application should be repeated as often as needed.

Surface application of this spray to walls and ceilings should be made only after food or feed processing equipment is covered to prevent contamination of this equipment by spray mist or falling insects.

It is suggested that Winru Pyrenone[®] Oil Spray Concen-

A Pyrenone[®] spray concentrate especially designed for use around food plants where food products are prepared, handled or stored.

ACTIVE INGREDIENTS:

*Technical Piperonyl butoxide.....	5.00%
Pyrethrins50%
Petroleum distillate	94.50%

100.00%

*Reg. U. S. Pat. Off. FMC.

*Equivalent to 4.00% (Butylcarbityl) (6-propylpiperonyl) ether and 1.00% of related compounds.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Remove pets, birds, and fish bowls from areas being sprayed. In food processing plants, treatments should not be made while plant is in operation. Food and food handling equipment should be covered while fogging or spraying is being done. This insecticide is an oil base material and should not be stored, sprayed or otherwise exposed toward or near an open flame.

DIRECTIONS—Continued:

trate be applied at the rate of one gallon of diluted spray to 1,000 square feet of surface for best results.

Winru Pyrenone[®] Oil Spray Concentrate may be diluted at the rate of 1 gallon of concentrate with 1 gallon of deodorized kerosene or other suitable petroleum distillate and used in mechanical or thermal fog generators for the control of exposed stages of flies, mosquitoes, wasps, hornets, flying moths, and gnats.

Dosages may vary with different fogging generators but most such applicators are designed to give most effective results when one pint of diluted spray is used for each 6,000 to 10,000 cubic feet of space. In all cases dosages should be sufficient to thoroughly fill the enclosure with fog or vapor.

DO NOT EXCEED A DOSAGE OF 1 GALLON IN 50,000 CUBIC FEET OF SPACE.
