

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
(& DOMESTIC ANIMALS)**

CAUTION

Harmful if swallowed. Food should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before use. When using the product in these areas, apply only when the facility is not in operation.

Do not breathe spray mist. Wear mask or respirator of a type recommended by the U.S. Bureau of Mines to give adequate protection against this material. Wear protective clothing. Wash hands, arms and face with soap and water after handling and before eating or smoking. Wash all contaminated clothing with soap and water before re-use. Remove pets, birds, and cover fish aquariums before spraying.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

"It is a violation of federal law to use this product in a manner inconsistent with its labeling."

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Pesticide Disposal: Pesticide, spray mixture, or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, state, or local procedures.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved state and local procedures.

General: Consult Federal, State or Local Authorities for approved alternative procedures.

The Industrial Fumigant Company

WEEVLDOOM
LIQUID GRAIN PROTECTANT ^{TRADEMARK}

An emulsifiable spray concentrate containing piperonyl butoxide and pyrethrins to be diluted at the place of use for direct application to the grain stream.

WeevlDoom will control rice weevil, granary weevil, confused flour beetle, lesser grain borer and saw-toothed grain beetle all of which may infest wheat, barley, oats, rye, rice, corn and milo or sorghum in bulk storage.

INGREDIENTS		
Active	*Technical piperonyl butoxide	33.00%
	Pyrethrins	3.30%
	Petroleum distillate	43.70%
Inert		20.00%
	Total	100.00%
	*Equivalent to 26.4% (butylcarbityl) (6-propylpiperonyl) ether and 6.6% of other related compounds.	

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

STATEMENT OF PRACTICAL TREATMENT

If swallowed—Call a physician immediately. Gastric lavage is induced if material was taken internally. DO NOT INDUCE vomiting unless other treatment is not available. Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting give victim one or two glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

If inhaled—Remove victim to fresh air. Apply respiration if indicated.

If on skin—Wash immediately with soap and water.

If in eyes—Flush eyes for at least 15 minutes with water. Call a physician immediately.

See side back panels for additional precautionary statements.

**KEEP OUT OF REACH OF CHILDREN.
CAUTION**

HARMFUL IF SWALLOWED. Not for household use. For industrial use only. Store in cool place. Do not freeze.

DIRECTIONS

WeevlDoom diluted with water or other grades of oil forms a fast separating mixture. Consequently it is extremely white spraying. Special care should be exercised. WeevlDoom concentrate to spray tank then pour water or oil as described above, then close the shut-off the spray delivery hose, start pump and permit WeevlDoom and water or oil as described above to flow slowly until start spraying until dilution is 1 part WeevlDoom to 100 parts water or oil. Adjust to proper pressure immediately.

It is essential that storage bins and equipment be cleaned after grain. After cleaning interior surfaces and equipment a water solution of 1.0% piperonyl butoxide and 0.1% of 1 gallon to 750 square feet of surface or to the pro-

USES

This product controls weevils, beetles, grain moths, and confused flour beetles. Dilute 1 gal. of WeevlDoom concentrate with water and apply spray at the rate of 1.0 gal. per 1000 sq. ft. of grain. Apply spray to grain as far from the grain as possible so that the entire volume can be treated. Continue spraying during conveying or elevating process thereby in contact with the unsprayed grain.

This treatment will protect grain from weevil and beetle infestation for 12 months.

Most satisfactory results will be obtained in clean bins containing not more than 1% dockage. Grain containing a higher percentage of dockage should be cleaned before any treatment is attempted. Infested grain should be fumigated prior to applying WeevlDoom.

IT IS IMPERATIVE THAT THE EXACT DOSAGE BE APPLIED.

CAUTION: For best results do not apply WeevlDoom to grain containing more than 12% dockage.

Do not reuse container. Destroy when empty.

NOTE

Cereal grains treated with WeevlDoom should be stored in a cool, dry place. Since the grain on the surface is exposed to light and air, the spray may deteriorate more rapidly than that which is not so strong enough to repel reinfestation. If upon examination insects are alive in the upper 2 or 3 inches, WeevlDoom should be applied to cover the top layer with approximately 2 gals. per 1000 sq. ft. or a sufficient amount to cover the entire surface as needed.

WARRANTY
THE INDUSTRIAL FUMIGANT COMPANY warrants that the product conforms to the description and is reasonably fit for the purposes specified when used in accordance with directions on the label. This warranty does not extend to any other use but neither this warranty nor any other WARRANTY, LIABILITY or FITNESS FOR A PARTICULAR PURPOSE implied, extends to the use of this product contrary to the label or under abnormal conditions or under conditions not foreseeable to seller, and buyer assumes the risk of such use.
