The Selig Chemical Industries of National Service
P.O. Box 43106
Atlanta, GA 30336

Attention: Michelle Nooney

Gentlemen:

Subject: Selig's Pinetax
EPA Registration No. 491-8
Your Amendments Dated January 12 and March 28, 1989

This is in response to the submitted data and label revisions.

The submitted (neutralization) data complete and clarify the data report.

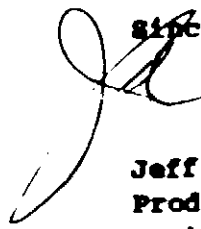

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided you:

1. Delete the "AA" from you EPA Registration Number.
2. Delete "Avoid breathing vapors" from your Precautionary Statements.

Two stamped copies of the label are enclosed for your records and to submit to Puerto Rico.

Submit five (5) copies of your final printed label within 30 days.

Sincerely yours,

Jeff Koster
Product Manager (32)
Antimicrobial Program Branch
Registration Division (E7505C)

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Recommended for disinfecting in schools and other institutional (nonmedical) facilities.

DIRECTIONS FOR DISINFECTING
Remove all filth and dirt from premises or surfaces to be disinfected. A 10 minute contact time is necessary to assure disinfection of surfaces for all applications described below. Use a solution made up of one part PINETAX to 100 parts water (approximately 1.3 ounces per gallon). This acts as a disinfectant against *S. choleraesuis*. Toilet rooms, toilet seats, wash-basins and urinals, as well as other similar fixtures should be cleaned first as above directed and then washed with the above PINETAX solution by sponge, mop, or cloth to wet all surfaces thoroughly. Toilet bowls should be flushed and then add the PINETAX solution (1.3 ounces per gallon) directly to the bowl water. Swab the bowl completely using a scrub brush or mop, making sure to get under the rim, and let stand for at least 10 minutes, then flush. In a typhoid sickroom to disinfect utensils, bed pans, clothes, beds and rooms, first clean and remove all filth and dirt from the premises or surfaces to be disinfected, then use a solution made up one part PINETAX to 100 parts water (approximately 1.3 ounces per gallon) and thoroughly wash by sponge, mop, or cloth all surfaces, premises and utensils in this solution, being careful to wet all surfaces thoroughly. For cleansing and deodorizing cuspidors, first clean, then immerse in a solution of one part PINETAX to 100 parts water (approximately 1.3 ounces per gallon). Let some of this solution remain in the cuspidors while in use. Fresh solution should be prepared daily or more often when the solution becomes diluted or soiled.
