FABRITEKS (W)

MOTHPROOFS FABRICS, DRAPERIES, WOOLENS, RUGS,
CLOTHING, CARPETS, AND UPHOLSTERED FURNITURE

ACTIVE INGREDIENTS: Sodium Aluminum Fluosilicate 0.5%
INERT INGREDIENTS 99.5%

KILLS THE LARVAE

DIRECTIONS

FABRITEKS (W) when used as directed will mothproof for at least one year and will not spot, stain or shrink any fabric which is unaffected by plain water.

FABRITEKS (W) should be applied with sprayer which should be held about a foot from the material to be mothproofed. All cuffs, seams and obscure folds in clothing and other materials should be carefully exposed to the mist so that every part of the fabric is treated and thoroughly wetted with FABRITEKS (W). Repeat treatments should be made to all articles which are subject to washing and frequent dry cleaning.

It is preferable to use a glass sprayer container with FABRITEKS (W). If metal container is used, rinse out thoroughly after each use. Do not let stand in metal container.

CAUTION:

Harmful if swallowed! Avoid prolonged breathing of spray mist. Avoid contamination of feed and foodstuffs. KEEP OUT OF REACH OF CHILDREN AND PETS.
