SELIG'S WINTERMINT

DISINFECTANT—DEODORANT—MINT ODOR

AOAC Phenol Coefficient 5—S. Typhosa

ACTIVE INGREDIENTS: Isopropyl Alcohol, Potassium Chloro-2-Phenylphenate, Potassium Soaps of the Fatty Acids of Tall Oil, Methyl Salicylate and Steamed Distilled Pine Oil.

INERT INGREDIENTS: Water not over 54%.

A DISTINCTIVE DISINFECTANT, GERMICIDE AND DEODORANT FOR USE BY INDUSTRIAL FIRMS, INSTITUTIONS, SCHOOLS, COLLEGES, HOTELS, DEPARTMENT STORES, OFFICE BUILDINGS AND TRANSPORTATION COMPANIES.

DIRECTIONS

GENERAL DISINFECTION: Remove all filth and dirt from premises, utensils, etc., to be disinfected, then wet all surfaces with a solution made of one part WINTERMINT mixed in 100 parts of water. This solution acts as a disinfectant against S. Typhosa.

MOPPING AND SCRUBBING: WINTERMINT should be used in scrubbing and mopping solutions using a mixture of four ounces or about a half cupful of WINTERMINT to each 2 gallons of water. WINTERMINT should also be used in your regular scrubbing soap solution as it increases their cleaning ability and acts as a pleasant deodorant and germicide.

TOILET BOWLS, URINALS, BED PANS AND CUSPIDORS: First thoroughly clean then disinfect using a solution of 3 ounces of WINTERMINT to one gallon of water. Let some of this solution remain in cuspidors at all times.

CAUTION

CAUTION: Harmful if swallowed.
KEEP OUT OF REACH OF CHILDREN
