 N-Alkyl (50% C12, 30% C14, 17% C16, 3% C18)
 Dimethyl ethylbenzyl ammonium chlorides..... 2.7%
 Isopropyl Alcohol 1.5%

INERT INGREDIENTS:

Water, Dye, and Perfume, not over.....93.1%

A.O.A.C. PHENOL COEFFICIENT:

S. Typhosa 27
 S. Aureus 41

A different disinfectant with the delightful odor of freshly squeezed lemons. Manufactured especially for use in industrial plants, institutions, and hospitals. Should not be used with soap or anionic detergents.

GENERAL DISINFECTING: Remove all filth and dirt from premises or utensils to be disinfected. Then wet all surfaces with a solution of 1½ ounce LEM-O-DIS per gallon of water. This solution acts as a disinfectant against S. Typhosa and S. Aureus when used as directed.

MOPPING: Use LEM-O-DIS in mopping solutions of 1½ oz. to 1 gal. of water.

TOILET BOWLS: First thoroughly clean then remove residual water from bowl prior to the application of the recommended disinfecting solution

CAUTION

Harmful if swallowed. Avoid contamination of foodstuffs. Avoid getting concentrate in eyes. In case of contact, wash thoroughly with water. If irritation persists, get medical attention.
