

[491-181]

# DU-KIL X-T

### ACTIVE INGREDIENTS

Pyrethrins .....	.20%
*Technical Piperonyl Butoxide .....	.40%
N-Octyl Bicycloheptene Dicarboximide .....	.68%
Petroleum Distillates .....	98.72%
	100.00%

\*Equivalent to .32% of (Butylcarbityl)(6-Propylpiperonyl) Ether and .08% of related compounds.

An effective fast acting insecticide formulated especially for use in food processing and bottling plants.

Also, ideal for insect control in institutions, public buildings, hospitals, hotels, clubs, restaurants and theatres.

Kills on contact the exposed stages of:

ROACHES	SPIDERS	MOSQUITOES	WASPS	BOXELDER BUGS	CARPET BEETLES
SILVERFISH	ANTS	SKIPPERS	HORNETS	CLOVER MITES	TICKS
CRICKETS	FLIES	GNATS	FLEAS	CLOTHES MOTHS	BEDBUGS

### DIRECTIONS

For most effective results against the active stages of the above named insects, use in a good sprayer adjusted to deliver a fine mist. Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying. Do not remain in treated areas. Ventilate the area after treatment is completed.

**Flying Insects.** For control of flies, mosquitoes, gnats, boxelder bugs, wasps and hornets direct the spray toward the upper portions of the room and saturate the atmosphere with the mist, using 2 to 3 ounces to each 1000 cubic feet of space.

**Crawling Insects.** To control roaches, silverfish, crickets, spiders, scorpions and clover mites, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames and pipes; toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

**Against ant infestations,** treat shelves, cabinets and storage areas; spray ant runs, trails, baseboards, thresholds and other places of entry, and treat nests liberally.

**In controlling fleas and ticks,** direct the application toward lower wall portions, baseboards, rugs, carpets and floors of infested areas. Animal quarters, kennels and bedding should also be sprayed.

**For most effective control of clothes moths and carpet beetles,** remove infested articles from storage, wash thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally to all surfaces of empty chests, closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from the fabric and applying the liquid lightly to avoid the possibility of staining. Be sure to spray in all folds and seams of articles to be protected. Treat both sides of rugs, carpets and pads, and all exposed and accessible surfaces of overstuffed furniture. Repeat treatment every 20 (or 30) days for articles not stored in moth-tight containers.

DU-KIL is an excellent insecticide for use as a vapor, fog or mist spray in special generators. Regulate dosage in accordance with equipment manufacturers' directions for the particular type of applicator employed. Application should be sufficient to thoroughly fill the enclosure with fog, mist or vapor. Repeat all treatments as necessary.

## CAUTION

**KEEP OUT OF THE REACH OF CHILDREN  
HARMFUL IF SWALLOWED**

Do not use, pour, spill or store near heat or open flame. Avoid breathing vapor and contact with skin and eyes. Remove pets and bird cages from rooms being sprayed. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. When using the product in these areas apply only when the facility is not in operation.
