

# SELIG'S SELECTA-WEED NO. 80

Controls many turf and lawn broadleaf weeds  
and surface-creeping broadleaf weeds without  
injury to most ornamental lawn grasses.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

Best results are obtained after application in the bare areas where the weeds have been removed, the bare areas may be reseeded 3 to 4 weeks after the MCPP acts more slowly than other herbicides.

**WHEN TO APPLY**  
Apply in spring, or fall, when weeds are controlled more easily in spring.

**PRECAUTIONS:** Do not apply in hot conditions or during very hot weather. Do not mow for several days before or after application. Do not water for 24 hours after application. Do not use if you want clover in your lawn. Do not use on turf where these conditions may affect the turf. Do not use on local turf or weeds unless as to dosage and time of application.

**CLEANING OF EQUIPMENT AFTER USE:** It is difficult to clean out 2,4-D and other equipment, therefore, use for purposes where even trace injury is not a problem. If this cannot be made for steel tanks. Flush equipment thoroughly, immerse in water, add an alkaline solution. 1 qt. of household ammonia or 2 lbs. of Soda Ash per 100 gallons of water. Drain and rinse thoroughly after each time.

Handwritten notes and a table of contents on the left side of the page. The table of contents includes sections like 'Directions for Use', 'Mixing and Application', and 'Precautions'. There are also some illegible handwritten notes and a small table with numbers.
