

TEST FOR SALT CONTENT

Preparation:

Salt is determined by the following method. Weigh 100 g of sample and add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

ACCEPTED
JUN 25 1968
UNDER THE FEDERAL INSPICION
PUNICIDE AND POFENICIDE ACT

ED UNDER 49-154
TO ATTACHED COMMENTS.

100 g of sample is weighed into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

100 g of sample is weighed into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

Caution: This test is for salt content only. It does not determine the presence of other impurities. The test is not applicable to samples containing volatile substances. The test is not applicable to samples containing substances which are not soluble in water.

Net weight 1 lb. 2.35 oz.

Test Procedure:

1. Weigh 100 g of sample into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

2. Weigh 100 g of sample into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

3. Weigh 100 g of sample into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

4. Weigh 100 g of sample into a 250 ml beaker. Add 100 ml of distilled water. Boil for 10 minutes. Filter and wash with 10 ml of distilled water. Dry in a desiccator over calcium chloride for 24 hours. Weigh and calculate the percentage of salt.

Test Results:

RESULTS OF TESTS:

The following table shows the results of the tests for salt content. The results are given in percent. The test is not applicable to samples containing volatile substances. The test is not applicable to samples containing substances which are not soluble in water.

It is noted that the results of the tests for salt content are given in percent. The test is not applicable to samples containing volatile substances. The test is not applicable to samples containing substances which are not soluble in water.

Continuation of Right Side :

ACTIVE INGREDIENTS: 10.0%

Isobutanol; triethanolamine laurate, myristate and ricinate complex;
Potassium *p*-tertiary-amylphenate; Potassium *o*-benzyl-*p*-chlorophenate;
Potassium *p*-phenylphenate; 2,2'-methylenebis-(3,4,6-trichlorophenol);
Potassium *p*-chloro-2-phenylphenate; Potassium *o*-chloro-2-phenylphenate.

INERT INGREDIENTS: 89.9%

Isobutene (propellant); 2-Butoxyethanol; Dimethyl silicone;
Sodium tripolyphosphate; Sodium Nitrite, ammonia

*Includes Solvents, Emulsifiers, Builders, and Propellant.
