SELIG'S NP-40

COMPOSITION

Active Ingredients:
 Poly oxyethylene dimethylamine hydrochloride
 (dimethyliminodiacetate) 10.0%
 Inert Ingredients 90.0%

APPLICATIONS

NP-40 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using NP-40.

For pools having just started algae growth, a 10% initial dose of 75 to 115 fl. oz. of NP-40 per 10,000 gallons of water will remove newly settled algae debris by cleaning.

For treatment of a fresh algae problem, apply 40 to 70 fl. oz. of NP-40 per 10,000 gallons of water.

To maintain pools free of visible algae, apply 27 fl. oz. of NP-40 per 10,000 gallons of water every 5 to 7 days after the initial treatment.

Uniform distribution of the product is essential for maximum effectiveness.

NP-40 is non-toxic to humans and animals. It is effective against both green and blue-green algae. It is a chlorine-chlorine compound and does not require the use of chlorine tablets. However, it is not a substitute for chlorine in pools.

CAUTION

Keep out of reach of children.

NP-40 is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using NP-40.

For pools having just visible algae growth add an initial dose of 75 to 115 fl. oz. of NP-40 per 10,000 gallons of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and treated pool add initially 41 to 75 fl. oz. of NP-40 per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fl. oz. of NP-40 per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of NP-40 throughout the water in the pool is necessary for maximum effectiveness.

NP-40 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. NP-40 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix NP-40 with concentrated dry or liquid chlorine products.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If swallowed do not get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard immediately without perforating or crushing. Bury or burn. Do not allow to enter water supply.

This product is toxic to fish. Do not use in ponds or streams. Runoff water will drain into lakes, streams, ponds, or rivers. Apply this product only as specified on this label.
