

MR. TRIPLE ZERO WEED KILLER

Non-Selective Type. Emulsifiable Concentrate - To be Diluted with water or petroleum distillate before use. Multi-Purpose - Kills most growth - Kills Johnson grass and Poison Ivy.

ACTIVE INGREDIENTS:		
HEAVY AROMATIC SOLVENT	93.10%	94.62%
BROMACIL 5-BROMO-3-SEC. BUTYL-6-METHYLURACIL	1.52%	
INERT INGREDIENTS:		5.38%
		100.00%

GENERAL INFORMATION

A water emulsifiable concentrate to be diluted with water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds and is particularly useful for the control of perennial grasses.

TIMING

Control most weeds for an extended period of time on non-cropland areas such as railroad, highway, and pipeline rights-of ways, petroleum tank farms, lumberyards, storage areas, and industrial plant sites. For best results, apply in use solution when weeds are less than six inches high. Repeat if necessary. Do not apply when ground is frozen.

DIRECTIONS

For annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, and ragweed, mix one part with nine parts of water and apply with a sprayer at the rate of one gallon per 100 square feet.

For perennial weeds and grasses such as bluegrass, redtop, purple top, aster, dandelion, and goldenrod, mix one part with four parts water and apply with a sprayer at the rate of one gallon per 100 square feet.

For Johnson grass and other hard to kill perennial weeds and grasses such as Bermuda grass, Bahia grass, fescue, saltgrass, and bluegrass, mix one part with two parts of water and apply with a sprayer at the rate of one gallon per 100 square feet.

It may be used in any concentration, but should be stirred thoroughly before use. If the concentrate is stored for any length of time before use, it should be restirred.

Do not use on cultivated crops and grasses. Do not use with known or suspected poison ivy, poison oak, or poison sumac.

CAUTION

GENERAL INFORMATION

A water emulsifiable concentrate to be diluted with water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds and is particularly useful for the control of perennial grasses.

TIMING

Control most weeds for an extended period of time on non-cropland areas such as railroad, highway, and pipeline rights-of-ways, petroleum tank farms, lumberyards, storage areas, and industrial plant sites. For best results, apply in use solution when weeds are less than six inches high. Repeat if necessary. Do not apply when ground is frozen.

DIRECTIONS

For annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, and ragweed, mix one part with nine parts of water and apply with a sprayer at the rate of one gallon per 100 square feet.

For perennial weeds and grasses such as bluegrass, redtop, purpletop, aster, dandelion, and goldenrod, mix one part with four parts water and apply with a sprayer at the rate of one gallon per 100 square feet.

For Johnson grass and other hard-to-kill perennial weeds and grasses such as Bermuda grass, Dallis grass, nutgrass, saltgrass, and horsetail, mix one part with two parts of water and apply with a sprayer at the rate of one gallon per 100 square feet.

Dilutions with water form an emulsion. It should be stirred thoroughly before use. If the emulsion stands for any length of time before use, it should be restirred.

For a faster kill of established weeds and grasses, dilute with kerosene, mineral spirits, or fuel oil in the same quantities as called for above for water.

CAUTION**KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. Do not induce vomiting. Call a physician immediately. May irritate eyes, nose, throat, and skin. Avoid breathing of spray mist. In case of contact, flush skin or eyes with plenty of water; for eyes, get medical attention. Contaminated clothing should be washed before reuse.

DIRECTIONS

DO NOT apply, drain, or flush equipment on or near desirable trees or other plants or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. DO NOT use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to desirable plants. DO NOT contribute to water used for irrigation or domestic purposes. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Thoroughly clean all traces from application equipment. Inadvertently other uses; otherwise, injury to desirable vegetation may result when not properly used and stored. DO NOT reuse container; destroy when empty.
