

Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions and industry.

Selig's 76-SX-81 has been formulated to aid in the reduction of cross-contamination in these areas.

Selig's 76-SX-81 is a one-step disinfectant cleaner that is effective against a broad spectrum of bacteria, virucidal, fungicidal, and will prevent the growth of mold and mildew and their odors when used as directed.

Selig's 76-SX-81 is an effective one-step sanitizer cleaner for use on non-food contact surfaces.

When used as directed, Selig's 76-SX-81 will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause malodors.

This disinfectant reduces the surface tension of water, improving its wettability. Microbes are capable of mass reproduction in sub-visible pores, scratches and cracks of surfaces. The excellent wettability of this disinfectant improves the penetration of the use solution into areas that otherwise might not be reached.

This disinfectant is effective against a wide variety of gram-positive and gram-negative bacteria. It is also an excellent deodorant and is especially effective in controlling odors that are bacterial in origin. Has a pleasant lemon odor.

This disinfectant mixes with water to form clear, stable use solutions. Use solutions are non-corrosive and non-staining to plastic, vinyl, synthetics, enamel, tile and most common metals.
