ACTIVE INGREDIENTS
Gamma Isomer of Benzene
Hexachloride from Lindane 20%
INERT INGREDIENTS 80%
Net Contents 25 grams

BUG-TAB is a
professional formula
made by professional
exterminators

for patios, porches, yards, picnics, lawns, light several
tablets in the area to repel and/or kill mosquitoes, flies, gnats and certain
other small flying insects. For outdoors, use only in still air and repeat
application as often as necessary.

Close doors and windows. Remove pets, fish, humans and
cover any food in room to be treated. Place a tablet on a plate and hold
lighted match to tablet. A white cloud like fog forms that penetrates entire
room. When BUG-TAB is used, treated space must be closed and no
occupancy permitted during operation. A minimum of 4 hours after treat-
ment shall be allowed for complete diffusion and settling of suspended
particles and thorough airing of treated areas or spaces. One tablet
effective for 500 cubic feet. The longer the room is permitted to stay
closed with fog, the longer lasting and more effective the results. Repeat
as needed but no more frequently than once in two weeks.

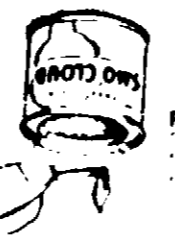

CAUTION: Avoid prolonged breathing of fog. Keep out of reach of
children. Avoid contact with skin and eyes. Wash hands thoroughly after
handling. If taken internally, give a teaspoon of salt in a glass of warm
water. Call physician immediately.
