CAUTION: COMBUSTIBLE MIXTURE N.Y.F.D.C. of A. 2173

When sprayed on woolen fabrics CHASE'S Moth Proofer will leave a non-objectionable protective deposit which kills adult moths and carpet beetles and larvae of moths and carpet beetles on prolonged contact. One treatment, applied according to directions, protects woolens from these insects during a storage period of 12 months unless removed by washing or dry cleaning.

HOW TO OPERATE: (1) Remove protective cap. (2) Direct nozzle opening AWAY FROM YOU. (3) Press down valve to release spray.

DIRECTIONS: Woolen articles such as suits, dresses, blankets, upholstery and rugs should be clean before treatment. Hold dispenser 18 inches from fabric. Move across surface at the rate of 1 ft. per second. Each application across the fabric should be 6 inches apart to avoid waste and heavy accumulation of material. For best results, spray entire article on both sides where possible and pay special attention to folds and seams. Properly sprayed articles should be just moist to the touch; avoid saturating. Respray if materials are washed or dry cleaned.

The contents of this dispenser will protect approximately 10 pounds of wool when properly used.

Suits, Dresses and Coats: An average suit weighs approximately 3 lbs. and can be treated with 2 minutes spraying time. Heavy suits and coats will take a proportionally longer time to treat.

Blankets and Upholstery: A medium weight blanket weighs approximately 6 lbs. and can be treated with 4 minutes of spraying time or at the rate of 1/2 minute per square yard. Treat upholstery surfaces thoroughly, especially concealed areas, seams, welting, tufts and folds.

Floor Coverings: This dispenser is not intended for large-scale treatment of rugs and carpeting, but will afford excellent spot protection. Use on concealed and undisturbed areas such as under furniture and rugs, in corners and around baseboards.

For additional protection spray insides of closets and storage containers. Direct spray toward cracks, baseboards and other places where insects may possibly hide.

CAUTION: Do not store at temperatures above 120° F or place container on radiators, stoves or where excessive temperatures may be encountered. Avoid prolonged inhalation of spray. Do not spray directly on skin of humans and pets. In case of accidental contact wash with soap and water. Avoid contamination of foodstuffs and cooking utensils. Remove birds, pets and fish bowls from room being sprayed. Keep away from children. Do not spray on plastic or asphalt materials. Do not wear clothing dampened by spray until dry. The contents of this container are under pressure. Do not puncture container or dispose of same in a fire or incinerator.

Active Ingredients:	
Terpene Polychlorinates (66% chlorine)*	5.0%
Petroleum Distillates	35.0%
Inert Ingredients:	
Propellent	60.0%
	100.0%

*STROBANE** (consists of Camphene, Pinene and related terpene polychlorinates).
