For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. May cause staining (darkening) of asphalt surfaces and shingles. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill *WASPS, HORNETS, YELLOW JACKETS and BEES* under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter, such as outside plumbing faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. Avoid spraying vegetation directly. Foliage of desirable plants that were contacted with spray should be hosed off.

**DO NOT USE THIS PRODUCT ON LIVING DECORATIVE TREES, SHRUBS OR ORNAMENTAL PLANTS.**

When using indoors and outdoors, avoid wetting asphalt tile, shingles, rubber or plastic materials. Test on an inconspicuous area before using near any other type of surface.
