OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

Ms. Laura E. Radevski
Chase Products Company
P.O. Box 70
Maywood, Illinois 60153

MAY - 2 2011

Dear Ms. Radevski:

Subject: Amendment-notification to comply with pyrethroids letter dated June 4, 2009
Champion SprayON Ant & Roach Killer 4
EPA Registration Number 498-187
Your submission dated May 10, 2010

The application referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following comments:

1. In the fifth paragraph under the heading Directions for Use the definition of nonfood/feed areas includes the site "floor drains (to sewers)", therefore you must add "Do not apply directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur, except as directed by this label."
2. Under the Directions for Use indoors on cockroaches, revise "When pets are drive out, spray directly." to read "When pests are drive out, spray directly."

A stamped label is enclosed for your records.

If you have any questions regarding this action, please contact Linda A. DeLuise of my team at (703) 305-5428.

Sincerely yours,

Richard Gebken
Product Manager (10)
Insecticide Branch
Registration Division (7505P)

(ANT & ROACH
KILLER
4)

- Recommended for households and commercial/industrial use in nonfood/feed areas
- Contains synergized Permethrin and Tetramethrin
- Provides quick killing action and residual control
- Economical do-it-yourself pest control
- Use indoors and outdoors
- Use indoors
- Use outdoors
- Kills fire ants
- Kills fleas, roaches, ants
- Kills fleas
- Kills roaches; kills ants
- Kills on contact – Kills fast
- Kills on contact; kills fast
- Kills hidden bugs
- Kills bugs you see and even the ones you don't
- A broad-spectrum insecticide highly effective against ants, carpenter ants, carpet beetles, centipedes, cockroaches, crickets, earwigs, firebrats, fleas, flour beetles, grain beetles, ground beetles, millipedes, mole crickets, moths, pill bugs, scorpions, silverfish, sow bugs, spiders, ticks and many other similar crawling insects
- Water-based formula; nonstaining
- No oily residues; no unpleasant odor
- Protects for up to 4 weeks

ACTIVE INGREDIENTS:

- * Tetramethrin0.10%
- ** Permethrin 0.25%
- *** Piperonyl butoxide, technical 0.50%

OTHER INGREDIENTS: 99.15%
Total 100.00%

- * 1-cyclohexene-1,2,-dicarboximidomethyl 2,2-dimethyl-3-(2-methyl-propenyl) cyclopropanecarboxylate.
- ** (3-phenoxyphenyl) methyl (+/-) cis/trans 3-(2,2-dichloroethenyl) 2,2-dimethylcyclopropanecarboxylate. Cis/trans ratio: min. 35% (+/-) cis and max. 65 % (+/-) trans.
- *** Equivalent to min. 0.4% (butylcarbityl)(6-propylpiperonyl) ether and 0.1% related

compounds.

CAUTION**

See back panel for additional precautionary statements.

BACK PANEL

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS**

CAUTION

Avoid contact with skin, eyes or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

STATEMENT OF PRACTICAL TREATMENT

IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water by disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not use in food/feed areas of food/feed-handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food/feed is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms, but excluding areas where food may be prepared or held.

In the home, all food-processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

May be used as a crack and crevice treatment or as a spot application in nonfood/feed areas. All areas where insects hide or through which insects may enter should be treated.

For use in nonfood/feed areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Not for use in Federally Inspected Meat and Poultry Plants.

Do not apply this product in occupied patient rooms or in any rooms/areas while occupied by patients, the elderly or infirm. Do not apply in classrooms when in use.

GENERAL INFORMATION: Provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include, but are not limited to, apartment buildings, homes, hotels, hospitals, nursing homes, schools, industrial buildings, laboratories, mausoleums, private residences, utilities and the nonfood/feed areas of food/feed-handling establishments, and on vessels, railcars, aircraft (cargo area only), buses, trucks and trailers.

SURFACE SPRAY APPLICATION: Hold container upright and direct spray away from face. Hold can 12-15 inches from surface being sprayed. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 4 ounces of product to treat approximately 25 square feet of surface area).

CRACK & CREVICE INJECTION: Hold container upright and attach injection tube for injection into cracks and crevices where insects may be hiding, living and breeding. Place injection tip 1/2 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release a one-second spray per spot. In serious infestations, if possible, place spots approximately 12 inches apart. In light infestations or for preventive treatment, place spots approximately three feet apart. In long, running cracks, move the injector tip along the crack while spraying. Move at the rate of one linear foot per second in heavy infestations and three feet per second in light infestations. See the additional directions below for effective control of specified insects.

INDOORS: COCKROACHES (INCLUDING ADULT AND IMMATURE STAGES OF BOTH NONRESISTANT AND ORGANOPHOSPHATE AND CARBAMATE RESISTANT STRAINS), ANTS, BOOK LICE, BOX ELDER BUGS, CENTIPEDES, CRICKETS, DERMESTIDS, FIREBRATS, FLEAS, PALMETTO BUGS, SILVERFISH, SOW BUGS, TICKS AND WATER BUGS: Apply thoroughly to all areas where these pests crawl and hide, especially in cracks and crevices, and hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and other refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and in similar areas. When pets are driven out, spray directly. Repeat as necessary.

ANTS: Spray freely around ant trails, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. Repeat as necessary.

CARPENTER ANTS: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Inject into wall voids and infested wood through existing openings or newly drilled small holes.

BROWN DOG TICKS & FLEAS IN BUILDINGS: Apply to infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other areas where these pests may be present. Old

6/7

bedding of pests should be removed and replaced with clean fresh bedding after treatment of pet areas. Do not use directly on pets.

SPIDERS: Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

CENTIPEDES, EARWIGS, GROUND BEETLES, MILLIPEDES, MOLE CRICKETS, PILL BUGS, SOW BUGS, SCORPIONS AND TICKS: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

PANTRY PESTS: GRAIN BEETLES (RUSTY, MERCHANT AND SAW-TOOTHED), FLOUR BEETLES (RED AND CONFUSED), CHOCOLATE MOTHS, CIGARETTE BEETLES, CLOVER MITES, CLUSTER FLIES, DRUGSTORE BEETLES, ELM LEAF BEETLES, RICE WEEVILS, LESSER GRAIN BORERS, SPIDER BEETLES AND TOBACCO MOTHS: Treat exposed stages. Remove all foodstuffs, utensils, and shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food and utensils.

CARPET BEETLES (BLACK, FURNITURE AND VARIED): Spray on and under edges of floor coverings, under rugs and furniture and in other localities where these insects are found.

WEBBING CLOTHES MOTHS: Use this product as a crack and crevice treatment in closets and other storage space where these pests are found. This is an adjunct treatment and will not control moth larvae already on clothes. Do not apply to clothing.

OUTDOORS: All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses. Applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and crack-and-crevice applications, only.

PESTS ON OUTSIDE SURFACES OF BUILDINGS: For control of building infestation due to ANTS, CLOVER MITES, CRICKETS, EARWIGS, MILLIPEDES AND SOW BUGS (PILL BUGS): Spray foundation of building where insects are active and may find entrance, up to a height of 2 to 3 feet. Apply as residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary. Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm.

CRAWLING INSECTS: ANTS, COCKROACHES, INCLUDING ASIAN COCKROACHES, CRICKETS, CENTIPEDES AND SILVERFISH: Spray infested surface of patio or picnic area, hitting as many insects as possible. Also spray legs of tables and chairs to repel ants. Spray ant hills for best control.

ANT, LONE STAR TICKS, DOG TICKS, CRICKETS, FLEAS AND EARWIGS: Apply thoroughly to infestation in bushes, grass or weeds. For ants, spray freely around ant trails and hills.

FIRE ANTS: To treat mounds, use a soil injector. To maximize spray distribution, insert injector into the mound full length if possible. Inject the mound at 3-6 sites at a rate of 5-10 seconds spray per site. For very large mounds (over 36 inches in diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one site in the center. To quiet active ants on mound surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

STORAGE & DISPOSAL

STORAGE: Store in a cool, dry place away from heat or open flame. Do not contaminate water, food or feed by the use, storage or disposal of this product.

DISPOSAL: DO NOT PUNCTURE OR INCINERATE!

If empty: Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions.

THE USER OF THIS PRODUCT ASSUMES ALL RISKS OF USE, STORAGE AND HANDLING NOT IN ACCORDANCE WITH ITS DIRECTIONS AND CAUTIONS.
