UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF CHEMICAL SAFETY
AND PESTICIDE REGISTRATION

Ms. Laura E. Radevski
Chase Products Company
P.O. Box 70
Maywood, Illinois 60153

Dear Ms. Radevski:

Subject: Amendment-notification to comply with pyrethroids letter dated June 4, 2009
Champion SprayON Insecticide Spray
EPA Registration Number 498-188
Your submission dated May 10, 2010

The application referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following comments:

- 1. In the sixth paragraph under the heading Directions for Use the definition of nonfood/feed areas includes the site includes the site "floor drains (to sewers)", therefore you must add "Do not apply directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur, except as directed by this label."

A stamped label is enclosed for your records.

If you have any questions regarding this action, please contact Linda A. DeLuise of my team at (703) 305-5428.

Sincerely yours,

Richard Gebken
Product Manager (10)
Insecticide Branch
Registration Division (7505P)

FRONT PANEL

CHAMPION SPRAYON
INSECTICIDE SPRAY

- * Controls named residential, industrial and garden insects.
- * For use on dogs and on premises to control fleas and ticks.
- * Controls fleas and ticks on dogs for 14 days.
- * An aqueous, stable micro emulsion.
- * Controls many other insect pests for up to 4 weeks.
- * Kills lice and their eggs.
- * Kills house dust mites in carpets, curtains and on upholstery.
- * Controls [helps control] House Dust Mites (*Dermatophogoides* spp.) for up to 8 weeks [2 months, 60 days] in carpets, bedding, curtains and on upholstery.
(NOTE – BACK PANEL TEXT SAYS “CONTROLS...8 WEEKS...” IF ONE OF THE ALTERNATE FORMS IS USED HERE, THE BACK PANEL MAY BE CHANGED TO AGREE WITH THE FRONT PANEL LANGUAGE.)
- * Controls [helps control] House Dust Mites that may cause asthma, hay fever, rhinitis, watery eyes, sneezing.
- * For use on mattresses, upholstered furniture, baseboards, floors, shelving, pet sleeping quarters, animal quarters and poultry houses.
- * Not for use on humans.

ACTIVE INGREDIENT:

Permethrin 0.50%

OTHER INGREDIENTS: 99.50%

Total 100.00%

EPA Reg. No. 498-188-XXXXXX

EPA Est. No. 498-IL-1

NET WT. XX OZ. (XXX g)

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panel for additional precautions.

FOR PRODUCT INFORMATION, CALL (708) 865-1000.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
CAUTION**

Harmful if absorbed through skin. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Avoid contamination of feed and foodstuffs. Remove pets and birds and cover fish aquariums before space spraying or surface applications. **This product is not for use on humans.** If lice infestations should occur on humans, use a product labeled for use on humans. Vacate room after treatment and ventilate before reoccupying. Do not allow children or pets to contact treated areas until surfaces are dry.

HAZARDS TO DOMESTIC ANIMALS

Do not spray directly in/on eyes, mouth or genitalia of pets. Do not use on dogs under twelve (12) weeks old. Consult a veterinarian before using this product on medicated, debilitated, aged, pregnant or nursing animals. Sensitivities may occur after using any pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

FIRST AID

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to any body of water. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. DO NOT PUNCTURE OR INCINERATE CONTAINER. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

We recommend that those with asthma or severe allergies consult a doctor before using this product and have someone else apply this product.

Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.

Do not use in food areas of food/feed-handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms, but excluding areas where foods may be prepared or held.

In the home, all food-processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

SHAKE WELL BEFORE USING

Hold container upright and spray from a distance of 12 to 15 inches. Remove birds and cover fish aquariums before spraying.

HOUSEFLIES, FRUIT FLIES, MOSQUITOES, GNATS, BLACKFLIES, SKIPPER FLIES, BLOWFLIES AND SMALL FLYING MOTHS: Close all doors and windows and spray room at the rate of 2 to 3 seconds per 1000 cubic feet. Direct spray to all parts of the room, especially windows and other light sources which attract these insects. Keep nozzle in constant motion. Repeat application every 4 weeks if necessary.

COCKROACHES, WATER BUGS, PALMETTO BUGS, SILVERFISH, FIREBRATS, CRICKETS, SCORPIONS, SPIDERS, MILLIPEDES, CENTIPEDES, SOW BUGS AND PILL BUGS: Spray into hiding places such as cracks and crevices, behind sinks, cabinets, along baseboards and floors, around drains and plumbing, hitting insects with spray whenever possible. Repeat application every 4 weeks if necessary.

ANTS: Spray trails, nests and points of entry. Spray on ants where possible. Repeat application every 4 weeks if necessary.

INDIAN MEAL MOTHS, ANGOUMOIS GRAIN MOTHS: Close doors and windows, direct spray into all parts of room, especially around stored food-product containers, pallets and darkened areas. Spray 7 to 10 seconds for each 1000 cubic feet of space. Keep area closed for 15 minutes following treatment. Repeat application every 4 weeks if necessary.

EXPOSED STAGES OF CONFUSED FLOUR BEETLES, SAW-TOOTHED GRAIN BEETLES, RED FLOUR BEETLES, RICE WEEVILS, GRANARY WEEVILS, GRAIN MITES: Spray into cracks and crevices, around cartons or containers, or other areas where these insects tend to congregate. For crack and crevice treatment, spray to the point of dampness but not runoff. Spray 30 seconds for each 100 square feet of surface. Keep area closed for 45 minutes to one hour after treatment. Repeat application every 4 weeks if necessary. Infested stored-food products in the home should be disposed of.

CARPET BEETLES: Spray directly on beetles, floors, baseboards, shelves and carpets. Repeat application every four weeks if necessary.

BEDBUGS: Spray mattresses, particularly around tufts and seams. Take beds apart and spray into all joints. After mattress is dry, cover with mattress cover and sheet. Do not use mattress without cover. Treat baseboards, moldings and floors. Spray to the point of dampness but not runoff. Allow all sprayed articles to dry thoroughly before reuse. Repeat treatment every 4 weeks if necessary.

To control **CLOTHES MOTHS AND CARPET BEETLES** on wool and other proteinaceous fibers: Remove infested articles from storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus and other storages, directing the spray into cracks, joints and crevices. Spray to the point of dampness but not runoff. After airing, infested articles may be treated by spraying lightly, keeping nozzle at least 3 feet from fabric to avoid staining. Allow all sprayed articles to dry thoroughly before use.

To control **HOUSE DUST MITES (DERMATOPHAGOIDES SPP.)** that may cause asthma, hay fever, rhinitis, watery eyes and sneezing: One treatment lasts for up to 8 weeks. **On Upholstered Furniture** – test fabric in an inconspicuous area to insure dyes will not bleed. Hold container upright with nozzle away from you. Depress valve and spray from a distance of 8 to 10 inches. Spray all fabric surfaces to the point of dampness but not runoff. Do not use on delicate fabrics. Allow furniture to dry thoroughly before using. **On Carpets** – spray over entire carpet to the point of dampness but not runoff. Hold the nozzle approximately 12 to 18 inches from the carpet surface and spray in a sweeping motion. Use an overlapping pattern to insure total coverage. After application, brush the surface of the carpet with a broom or brush to insure deep penetration. Allow carpet to dry thoroughly before reentering the treated area. Drying time can be accelerated by using a fan. Vacuum entire area, once dry. Since vacuuming stirs dust up in the air, those with allergies should have another person vacuum or should wear a dust mask and use a vacuum with high efficiency particulate (HEPA) filter. **On Mattresses** – spray the top, bottom and sides of mattresses to the point of dampness but not runoff, paying particular attention to tufts and seams. Allow to dry

thoroughly before using. After mattress is dry, cover with mattress cover and sheet. Do not use mattress without cover.

FLEAS AND TICKS (ADULTS AND LARVAE): Remove and thoroughly clean or destroy pet bedding. Spray pet sleeping quarters, bed, entire floor and floor covering, with special attention to cracks and crevices around baseboards and window and doorframes. Spray to the point of dampness but not runoff. Infested upholstered furniture may also be treated with this product. A test application should be made to upholstery or drapery fabrics in an inconspicuous place before use.

To kill **LICE AND LOUSE EGGS:** Spray in an inconspicuous area to test for possible staining or discoloration. Inspect again after drying, then proceed to spray entire area to be treated. Hold container upright with nozzle away from you. Depress valve and spray from a distance of 8 to 10 inches. Spray each square foot for 3 seconds. Spray only those garments and parts of bedding, including mattresses and furniture that cannot be either laundered or dry cleaned. Allow all sprayed articles to dry thoroughly before use.

To control **FLEAS, TICKS AND LICE ON DOGS:** Starting at the tail, stroke against the lay of the hair, spraying the parted fur in short bursts, directly behind the hand, to ensure penetrating the coat. Dampen the fur up to the head. Repeat application every 2 weeks, if necessary.

OUTDOORS: All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses.

FOR THE CONTROL OF GARDEN INSECTS: For use on roses, dahlias, asters and other ornamentals to kill **JAPANESE BEETLES** hit by spray, as well as **WHITEFLIES, APHIDS, EXPOSED THRIPS, SPIDER MITES, RED MITES AND LEAF MINERS.**

May be used on plants, and as a multipurpose spray in small gardens and for spot treatments of incipient insect infestations, to prevent spreading in large garden areas.

May also be used on other plants such as African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, crassula, dahlias, delphiniums, dogwood, English ivy, euonymus, fuschia, geraniums, grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering Jews and zinnias.

Effective when used as directed against **WHITEFLIES, APHIDS, SPIDER AND RED MITES, EXPOSED THRIPS, LACE BUGS, JAPANESE BEETLE, PAVEMENT ANTS, CLOVER MITES AND ARMYWORMS.** When spraying plants, do not operate closer than 18 inches. Use sweeping motion. Spray in one-second bursts. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Contact insects directly whenever possible. Reapply as reinfestations occur.

STORAGE & DISPOSAL

STORAGE: Store in a cool, dry place away from heat or open flame. Do not contaminate water, food or feed by the use, storage or disposal of this product. Avoid freezing.

DISPOSAL: DO NOT PUNCTURE OR INCINERATE!

If empty: Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions.

THE USER OF THIS PRODUCT ASSUMES ALL RISKS OF USE, STORAGE AND HANDLING NOT IN ACCORDANCE WITH ITS DIRECTIONS AND CAUTIONS.
