LABEL #18-5250

# barn fogger

### DIRECTIONS

**BARN USE** — Walk behind animals and direct fog over backs allowing approximately 1 second per animal. For most effective results, apply each morning.

**ANIMAL USE** — From approximately about 2-foot distance, thoroughly fog entire animal as it is being released to pasture. Spot-treat withers, shoulders and back where saliva accumulates from head tossing.

**MILKING PARLOR AND MILK ROOM** — Close all windows and doors. Fog at the rate of 1 to 2 seconds per 1000 cubic feet. If rooms cannot be closed tight, double the dosage.

Cover milking utensils and milk to prevent contamination from fog and dead or falling insects.

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator. Avoid contact with skin.

Stand in middle of room. Direct fog upward and fog in all directions. Seconds may be counted by saying one-thousand, two-thousand, etc. Keep room closed for 15 minutes after treatment. Example: A room 20-foot long, 12-foot wide and 8-foot high requires 2 seconds if closed tight; 4 seconds if not.

**FOR HOME USE** — To kill roaches, spiders, silverfish, wasps, thoroughly fog insects and all possible hiding places such as cracks, baseboards, sinks, cabinets and shelves. Repeat treatment when necessary.

Remove pets, birds and cover fish aquariums before fogging.

### WARNING:

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Avoid breathing of vapor.  
PRODUCT CODE: 05-0250

### SPECIFICATIONS

Flash Point: None. CSMA flammability test method.  
Explosive Point: None. CSMA explosive test method.  
Dielectric: 30.

Manufactured by Whitmire Research Laboratories, Inc., St. Louis, Mo. 63122
