DIRECTIONS

Wind should always be at back of user, and blowing toward object being sprayed.

STORAGE AND DISPOSAL:

STORAGE: Store in a cool dry place away from heat or open flame and inaccessible to children. Do not store above 130°F.

CONTAINER DISPOSAL: Do not reuse empty container. Do not puncture or incinerate. Replace cap and discard in trash.

PESTICIDE DISPOSAL: Securely wrap container in several layers of newspaper and discard in trash.

WASPS: With valve nozzle pointed toward nest, at a distance of 6 to 8 feet, spray until nest and wasps are contacted.

YELLOW JACKETS & BEES: Locate underground nest. Depress valve and spray with a sweeping motion any stimulated or stirred-up insects around nest opening.

Afterwards, move forward to nest opening and spray liquid from 6 to 8 seconds directly into nest hole. This will suffocate bees in nest; other bees trying to return to nest will be repelled and will fly around and away harmlessly.

HORNETS: From 6 to 8 feet away, spray directly into nest openings. Make sure entire nest and all hornets are contacted.

SPIDERS: Spray directly on spiders and web.

To prevent falling insects from falling on skin and clothing, do not stand directly under nest being sprayed.
