

### CRACK AND CREVICE INJECTION USE ONLY

For Roaches: German, American, Oriental, Brown Banded

Whitmire's Prescription Treatment Spot Residual is for use only with injection tube and for injecting into cracks and crevices where these insects may be hiding, living, and breeding.

Place valve on valve stem and press down lightly making sure tip is pointing away from face and body.

Place injector tip 1/2" into cracks, crevices, holes, and other small openings where the above insects may be a problem. Release approx. 1 second spray per spot. In serious infestation, if possible, place spots approx. 12" apart. In light infestation or preventive treatment, place spots approx. 3 feet apart.

For use by servicemen working for professional exterminators, in homes, restaurants, food processing plants, hospitals, super markets, motels, hotels. Cautions must be taken so no material comes in contact with exposed food products, equipment or packaging materials. They must be removed or covered before use. Do not use in commercial food preparation areas or in edible product areas of food processing plants.

**WARNING:** Keep out of reach of children. Contents under pressure. Do not use as a space spray. When container is exhausted, discard in safe place. Do not expose to temperatures above 120°F. Do not throw in fire.

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided.

Wash thoroughly after using.

Avoid contamination of food, utensils, and food preparation areas.

Should illness occur, get prompt medical aid. To Physician — Atropine sulfate is antidotal.

Nonflammable — C.S.M.A. Standards Nonexplosive — C.S.M.A. Standards
