

PRESCRIPTION TREATMENT

No. 140-SYNTHETIC PYRETHROID SBP-1382

FLUSHING AND CONTACT KILL

USES: For Roaches, Spiders, Waterbugs, Ants, Earwigs, Sowbugs, Centipedes, Grain Mites.

DIRECTIONS: Place valve on valve stem and press down lightly making sure tip is pointing away from face and body. Place injection tube tip in cracks, crevices, holes, and other small openings and release approximately 1 second per spot for flushing and contact kill.

Inject and spray all locations where the above insects may be a problem.

For use by servicemen working for professional exterminators in homes, restaurants, food processing plants, hospitals, super markets, motels, hotels, offices.

FOOD PROCESSING AREAS AND FOOD PLANTS:

For Use In Food Processing Areas Of Food Plants Observe The Following Cautions:

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when plant is not in operation.

Avoid prolonged or repeated inhalation and skin contact. Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° Fahrenheit may cause bursting. Never throw container into fire or incinerator. Discard in safe place. Do not spray where it may go into fish tank pumps.
