DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PT 529 is designed for use in pest automatic aerosol dispensing equipment.

Used in an automatic dispenser the special valve is activated automatically emitting 100 mg (gross weight) per cycle. Each dose contains millions of tiny particles which float in the air being a high proportion of long evaporating range, small flying moths and fruit flies.

Usually the effectiveness of PT 529 will be noticeable within one hour after the dispenser is activated. If less than 24 hour control is required, the dispenser should be set to emit one hour pulses control is desired and run one hour after control is established.

Factors such as air change rate, size and shape of room, humidity and temperature affect insect activity and control. dispenser per 5000 cubic feet may be considered as one to although in a room that has more openings can be one to two. Results are achieved when good sanitary practices are used. For best results, mount the dispenser as high as possible and in a location where opening air will carry spray throughout the desired area.

STORAGE AND DISPOSAL: Store in a cool area and from heat or open flame. Do not reuse empty container. Wrap container and put in trash collection.

- For Use In: Food Service and Preparation Areas, Hotels, Restaurants, Schools, Laboratories, Greenhouses, Nurseries, and other areas where insects are a problem.

3000 Metered Insecticide Sprays

Flies (Box, mosquitoes, gnats, small flying moths, and fruit flies)

Active Ingredients: Pyrethrin 0.50%, Piperonyl Butoxide, Technical 1.00%, N-ethyl bicyclohexane dicarboximide 1.67%

Net Weight: 95.83Z. Contains 3000 metered sprays of pyrethrin, Piperonyl Butoxide, and N-ethyl bicyclohexane dicarboximide.

KEEP OUT OF REACH OF CHILDREN. CAUTION: See side panel for additional precautions.
